Strategic people project management in the context of the delivery of a generic equipment space project for cellnet Eddie Fisher, 2008-07-15 Thesis M A from the year 1999 in the subject Sociology Work Education Organisation grade Pass Lancaster University language English abstract This dissertation discusses the importance of strategic people project management in critical cultural change projects Appropriate people management in projects is as important as the application of tools and techniques People make things happen Their input into the delivery of goals and objectives is essential These can be achieved by sharing knowledge good communications and working as one team I argue that nobody is perfect but a team can be People in projects really matter Tools and techniques assist project managers to manage their projects better but they are not a panacea to successful project management They are simply there to be used as means to assist the project manager to manage his projects better My approach to strategic people project management proved highly effective to bring together the people elements of this project Project Managers should familiarise themselves with and adopt the learning outcomes of this dissertation and consider applying these in their projects in future

Project Planning as Key to Success in Project Management Stefanie Vater, 2012-05-24 Bachelor Thesis from the year 2012 in the subject Business economics Business Management Corporate Governance grade 1.1 University of applied sciences D sseldorf language English abstract A CEO is presenting the annual report in front of 20 000 employees when suddenly the projector breaks

down A key account manager cannot pay the restaurant bill for his top client as he has lost his wallet A newly elected mayor misses his first public speech as he is being held up in a traffic jam All these examples taken from daily business and their negative effects such as the loss of time a damaged reputation and higher costs could have been avoided with an appropriate planning beforehand Projects are even more critical as they are by definition unique Although this idea seems to be consistent and companies should therefore strive to complete their projects successfully only 32 % of all projects succeed in terms of compliance with time budget and specifications 44 % are completed late exceeding budget showing a deficit in features or with a combination thereof The remaining 24 % of all projects fail i e they are cancelled before completion or are finished but never used Going back to the year 2000 this failure rate has never been higher A reason for this may be that the unique nature of projects also implies uncertainties the more aspects of a project are unique the higher are the entailed uncertainties and the higher is the risk to fail And projects are becoming more and more demanding with an increasing pressure on companies in terms of time budget and quality As globalisation is rising the need for fast and comprehensive adjustments of processes systems and products is increasing simultaneously To be able to bear the growing competitive pressure companies need fast innovative and interdisciplinary solutions which they achieve best by applying projects But projects lacking clear targets specifications communication channels schedules and budgets are likely to fail Hence an appropriate project planning is vital to avoid or at least minimise all uncertainties and risks that could lead to a full or partial failure of the project But project planning itself does not guarantee success It must be executed in a way that is comprehensive and efficient at the same time Finding out which planning processes are required and to which detail is crucial for performing a completely successful project
