Recent Books Published in Great Britain1940-Apr. 1941 ,1978 **Fieldwork in the Global South** Jenny Lunn,2014-03-26 Choosing to do fieldwork overseas particularly in the Global South is a challenge in itself The researcher faces logistical complications health and safety issues cultural differences language barriers and much more But permeating the entire fieldwork experience are a range of intermediating ethical issues While many researchers seek to follow institutional and disciplinary guidelines on ethical research practice the reality is that each situation is unique and the individual researcher must negotiate their own path through a variety of ethical challenges and dilemmas This book was created to share such experiences to serve not as a manual for ethical practice but rather as a place for reflection and mutual learning Since ethical issues face the researcher at every turn and cannot be compartmentalized into one part of the research process this book puts them at the very center of the discussion and uses them as the lens with which to view different stages of fieldwork The book covers four thematic areas ethical challenges in the field ethical dimensions of researcher identity ethical issues relating to research methods and ethical dilemmas of engagement with a variety of actors

This volume also provides fresh insights by drawing on the experiences of research students rather than those of established academics. The contributors describe research conducted for their master's degrees and doctorates, offering honest and self-critical reflections on how they negotiated ethical challenges and dilemmas. The chapters cover fieldwork carried out in countries across Africa, Asia, and Latin America on a broad sweep of development-related topics. This book should have wide appeal to undergraduates, postgraduates, and early career researchers working under the broad umbrella of development studies. Although focused on fieldwork in the Global South, the discussions and reflections are relevant to field research in many other countries and contexts.

Doing Children's Geographies provides a useful resource for all those embarking on research with young people. Drawing on reflections from original cutting-edge research undertaken across three continents, the book focuses on the challenges researchers face when working with children, youth, and their families. The book is divided into three sections. The first section provides alternatives to some of the difficulties researchers face and highlights methodological innovations as geographers uncover new and exciting ways of working. The second part specifically addresses the issues surrounding children and youth's participation, providing critiques of current practice and offering alternatives for increasing young people's involvement in research design. Finally, the book broadens to a consideration of wider areas of concern for those working with children and youth. This section discusses the nature of childhood in relation to research, the place of emotions in research with young people, and the process of undertaking applied research. This book was previously published as a special issue of *Children's Geographies*.
