the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already  
become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most  
important English language abstracting journal in the mentioned branches The abstracts are classified under more than a  
hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and  
important publication for all students and scientists working in the fields of astronomy and related sciences As such it  
represents a necessary ingredient of any astronomical library all over the world Space Science Reviews 1 Dividing the whole  
field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly  
comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices

always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes
