Soldiers Of Misfortune:

Soldiers of Misfortune Nancy Ellen Lawler, 1992 This is a study of the African veterans of a European war It is a story of men from the Cote d'Ivoire many of whom had seldom traveled more than a few miles from their villages who served France as tirailleurs riflemen during World War II Thousands of them took part in the doomed attempt to hold back the armies of the Third Reich in 1940 many were to spend the rest of the war as prisoners in Germany or Occupied France Others more fortunate came under the authority of Vichy France and were deployed in the Defense of the Motherland and its overseas possessions against the threat posed by the Allies By 1943 the tirailleur regiments had passed into the service of de Gaulle's free French and under Allied command played a significant role in the liberation of Europe In describing these complex events Dr Lawler draws upon archives in both France and the Cote d'Ivoire She also carried out an extensive series of interviews with Ivoirien veterans principally but not exclusively from the Korhogo region The vividness of their testimony gives this study a special character They talk freely not only of their wartime exploits but also of their experiences after repatriation Lawler allows them to speak for themselves They express their hatred of forced labor and military conscription which were features of the colonial system yet at the same time reveal a pride in having come to the defense of France They describe their role in the nationalist struggle as foot soldiers of Felix Houphouet Boigny but also convey their sense of having become a lost generation They recognize that their experiences as French soldiers had become sadly irrelevant in a new nation in quest of its history

Distributing the Harm of Just Wars Sara Van Goozen, 2021-03-11 This book argues that the risk of harm in armed conflict should be divided equally between combatants and enemy non combatants International law requires that combatants in war take all feasible precautions to minimize

damage to civilian objects injury to civilians and incidental loss of civilian life However there is no clear explanation of what feasible precautions means in this context or what would count as sufficiently minimised incidental harm As a result it is difficult to judge whether a particular war or offensive actually satisfies this requirement Just war theorists often consider it common sense that merely not intending to harm innocent civilians is not sufficient but there is little clarity in the literature regarding what this means One crucial question that is almost always overlooked is that of what the appropriate baseline distribution of risk should be This book defends the Minimal Harm Requirement MHR which states that combatants should make an effort to reduce merely foreseen harm to enemy non combatants to the lowest reasonable level In order to assess which risk impositions are reasonable and which are not an egalitarian baseline should be adopted suggesting that other things being equal risk of harm should be distributed equally between just combatants and unjust non combatants This book will be of much interest to students of just war theory ethics security studies and international relations
