Teacher Learning In Language Teaching:

Teacher Learning in Language Teaching Donald Freeman, Jack C. Richards, 1996-02-23 This book introduces a new field of educational research called teacher learning as it applies to the teaching of languages. Up until recently the study of second language teacher education has focused mainly on the knowledge base and specific skills needed for effective teaching. This book invites us to look at teacher education from a fresh point of view through an exploration of the thinking and learning processes of individuals as they learn to teach. Seventeen original articles based on studies done in North America, Europe, Asia, and Australia provide examples of pioneering research into the ways that individuals learn to teach languages and the roles that previous experience, social context, and professional training play in the process. The collection thus helps establish a research base for this newly developing field.

Becoming a (Better) Language Teacher Nora Benitt, 2015-08-19 This qualitative interpretative study investigates a cohort of twelve English teachers enrolled in the M.A. programme 'E-LINGO Teaching English to Young Learners'. The aim is to explore how and under what circumstances classroom action research, a core component of the programme, can foster teacher learning. Since the participants have different educational and cultural backgrounds and various levels of professional experience in the field of language teaching, they offer different perspectives on the object of research. Data from multiple sources are triangulated and interpreted to elicit indicators for learning and development in the form of critical learning incidents. The results suggest that not only cognitive but also social and affective factors constitute the complex process of teacher learning.

Teacher Education in CALL Philip Hubbard, Mike Levy, 2006-01-01 This volume addresses the need for a more considered and systematic approach to teacher education and training in Computer Assisted Language Learning (CALL) in all its forms: Technology Enhanced Language Learning, Network Based Language Learning, Information and Communication Technologies for Language Learning, and so on. The 20 chapters of the book are divided into five parts: 1. foundations of teacher education in CALL; 2. CALL degree programs; 3. CALL pre-service courses; 4. CALL in-service projects, courses, and workshops; 5. alternatives to formal CALL training. The chapters cover a broad range of levels, environments, countries, and languages. Rather than simply offering inspired speculation, the chapters provide practical information to readers reporting on what has actually been done in a wide variety of teacher education programs and courses around the world. In many cases, the chapters describe how programs and courses have evolved and include either qualitative or quantitative research or both to inform the structure of CALL courses, tasks, and activities.

Professional Development for Language Teachers Jack C. Richards, Thomas S. C. Farrell, 2005-04-04 This much needed text provides a coherent and strategic approach to teacher development. *Teacher Development for Language Teachers* examines ten different approaches for facilitating professional development in language teaching: self-monitoring, support groups, journal writing, classroom observation, teaching portfolios, analysis of critical incidents, case analysis, peer coaching, team teaching, and action research. Language Teacher Education and Technology Jeong-Bae Son, Scott Windeatt, 2017-06-29 Language teachers' competencies in computer-assisted language learning (CALL) are a crucial factor affecting their own implementation of CALL. However, there is still a concern that many language teachers are not adequately prepared to make effective use of CALL or to identify and evaluate potential CALL solutions. This can be the result of many different factors and raises the question of how to train teachers to develop their CALL knowledge and skills to a greater degree. The discussion of approaches to training language teachers in the use of technology adopted in areas of Australia, the UK, and the US provides valuable insights for those already involved in this area and inspiration for those who have some interest in carrying out this kind of training but as yet have little or no experience. This book explores the current status of CALL teacher education and discusses issues and challenges CALL teacher educators face in their own contexts. Specifically, it looks at postgraduate CALL courses offered at different universities to find ways of improving CALL teacher training. It represents the first overview of a topic that is relevant to most postgraduate courses in Applied Linguistics or TESOL across the globe. The use of technology for language learning and teaching is increasingly common but as is so often the case, training for teachers in how to use that technology remains limited to a large extent by lack of expertise among trainers.

Building Teacher Capacity in English Language Teaching in Vietnam Van Canh Le, Hoa Thi Mai Nguyen, Thi Thuy Minh Nguyen, Roger Barnard, 2019-08-06 This timely volume opens a window on issues related to English language education in Vietnam. The authors consider that teacher quality is the key factor to be considered if the national English language curriculum outcomes are to be achievable. Aiming to shed light on key issues recently observed in the Vietnamese landscape of English language education, it examines the complexity of the institutionalization of the standardized English proficiency policy which has been in force since 2008. That policy uses the Common European Framework of Reference for Languages (CEFR) as the model to set the standards and levels of proficiency for teachers, learners, and state employees. The book presents both the theoretical and practical aspects of the standardization movement in English language education. The contents comprise a series of extended research-based chapters written by experts of language in education policy and planning in and about Vietnam from a range of perspectives including teachers, English language curriculum developers, teacher educators, and researchers. The rich coverage of the book includes current discussion on English language education in Vietnam ranging from policy to practice, making it highly relevant to English teachers, teacher educators, and scholars in Vietnam and worldwide who aspire to broaden their horizons and professionalism.
