The Weather Of Britain:

British Weather and the Climate of Enlightenment Jan Golinski, 2010-11-15 Enlightenment inquiries into the weather sought to impose order on a force that had the power to alter human life and social conditions British Weather and the Climate of Enlightenment reveals how a new sense of the national climate emerged in the eighteenth century from the systematic recording of the weather and how it was deployed in discussions of the health and welfare of the population Enlightened intellectuals hailed climate's role in the development of civilization but acknowledged that human existence depended on natural forces that would never submit to rational control Reading the Enlightenment through the ideas, beliefs and practices concerning the weather Jan Golinski aims to reshape our understanding of the movement and its legacy for modern environmental thinking With its combination of cultural history and the history of science British Weather and the Climate of Enlightenment counters the claim that Enlightenment progress set humans against nature instead revealing that intellectuals of the age drew characteristically modern conclusions about the inextricability of nature and culture *The Weather of Britain* Robin Stirling, 1997 It is no accident that the weather is a perpetual topic of conversation in Britain For its range of extreme conditions our climate is quite unusual Winds of over 130 mph snowstorms producing 6 feet of undrifted snow in 15 hours protracted droughts hailstorms and deluges releasing 11 inches of rain in 24 hours Robin Stirling tells us of these and many other equally remarkable phenomena assessing their significance in relation to average conditions both locally and nationally and putting all the facts into perspective A mine of information The Weather of Britain has proved absorbing for all those with a general interest in the subject and valuable for people whose jobs and even lives depend on having a detailed and accurate knowledge of Britain's weather *The Naval History of Great Britain* William James, 1886
