The Doubting Kind:

The Doubting Believer Obadiah Sedgwick, 2017-01-13 Am I really a Christian At one time or another all believers encounter periods of doubt regarding the genuineness of their faith In this book Puritan pastor Obadiah Sedgwick explores the kinds of doubt that commonly arise in the context of true saving faith gently guiding the reader through fourteen circumstances likely to produce uncertainty Using the Bible as a roadmap the author helps us navigate away from the rocky shoals of doubt into the safe harbor of assurance Obadiah Sedgwick c 1600 1658 was a Presbyterian pastor and member of the Westminster Assembly Originally published in 1641 this classic treatise has been carefully prepared to benefit a new generation of Christian readers Archaic language has been gently modernized and helpful footnotes have been added to aid the reader Hundreds of Scripture references are embedded in the text using the English Standard Version This edition includes a foreword by Dr Don Kistler a biographical preface and review questions designed to facilitate group discussion or personal reflection

The Doubts and Loves of Yehuda Amichai Ido Bassok, 2024-11-15 This book presents the life and works of Yehuda Amichai born Ludwig Pfeuffer in Würzburg Germany Amichai an engaged political poet was an enlightened humanitarian European while remaining an authentic Israeli who loved his country and was deeply involved finding solutions to its problems

Classical Indian Philosophy of Induction Kisor Kumar Chakrabarti, 2010-05-06 Induction is a basic method of scientific and philosophical inquiry The work seeks to show against the skeptical tide that the method is secure and reliable The problem of induction has been a hotly debated issue in modern and contemporary philosophy since David Hume However long before the modern era Indian philosophers have addressed this problem for about two thousand years This work examines some major Indian viewpoints including those of Jayarasi 7th century Dharmakirti 7th century Prabhakara 8th century Udayana 11th century and Prabhacandra 14th century It also discusses some influential contemporary positions including those of Russell Strawson Popper Reichenbach Carnap Goodman and Quine The main focus is on the Nyaya view developed by Gangesa 13th century A substantial part of the work is devoted to annotated translation of selected chapters from Gangesa's work dealing with the problem of induction with copious references to the later Nyaya philosophers including Raghunatha 15th century Mathuranatha 16th century Jagadisa 17th century and Gadadhara 17th century An annotated translation of selections from Sriharsa 12th century of the Vedanta school Prabhacandra of the Jaina school and Dharmakirti of the Buddhist school is also included A solution is presented to the classical problem of induction and the Grue paradox based on the Nyaya perspective The solution includes an argument from counterfactual reasoning arguments in defense of causality analyses of circularity and logical economy arguments for objective universals and an argument from belief behavior contradiction

God's Solution to the Doubting Dilemma Gordon Kainer, 2016-02-02 Are you facing doubting dilemmas that challenge you doubts you find extremely annoying the kind that are messing up your Christian life Do you want to discover real solutions that are biblical effective and easy to understand If the answer is yes

then this book offers the answers you are seeking Readers will discover the reasons why believers in Christ like everyone else have doubting quandaries about such significant topics as God the Bible especially the story of creation In presenting the only effective solution that comes through God s grace this book will unveil the intimate relationship between heaven s rebellion and the creation event It will also reveal why there is such an aggressive present day effort to present the creation story as a myth or parable rather than a literal historical event

Analysis and Interpretation in the Exact Sciences Melanie Frappier, Derek Brown, Robert DiSalle, 2012-02-26 The essays in this volume concern the points of intersection between analytic philosophy and the philosophy of the exact sciences More precisely it concern connections between knowledge in mathematics and the exact sciences on the one hand and the conceptual foundations of knowledge in general Its guiding idea is that in contemporary philosophy of science there are profound problems of theoretical interpretation problems that transcend both the methodological concerns of general philosophy of science and the technical concerns of philosophers of particular sciences A fruitful approach to these problems combines the study of scientific detail with the kind of conceptual analysis that is characteristic of the modern analytic tradition Such an approach is shared by these contributors some primarily known as analytic philosophers some as philosophers of science but all deeply aware that the problems of analysis and interpretation link these fields together
