

# CHEMISTRY VS COMPATIBILITY:

**Chemistry refers to the emotional connection you feel with another individual.**

**Connection you feel with another individual.**  
Your chemistry is what creates the magnetic pull towards someone, what attracts you to their being and the foundation for sexual attraction.

**Compatibility on the other hand is related to lifestyle goals, values & overall vision.**

If you have chemistry without compatibility, this creates a short-term intimate relationship.

if you have compatibility without much chemistry, this creates a dry, passionless relationship.

**Both are needed for the relationship, to feel filled with passion, life, purpose & sustenance.**
