Karkra, 2012 THE BOOK The book is an open eyed journey through the mystic world of faith It is an intellectually stimulating account of the birth of religions As animal for definite have no religions and intelligence is the dividing line between man and animal it should be amply clear that religions have risen out the thinking faculty of man These are about God and His creation alright but not from God though human brain itself is a gift from God The book traces the story of religions from the earliest times and tries to reach to the core of all major belief systems of the world Towards the end it draws a sort of balance sheet of the religions to form an idea what good and bad these have done to the mankind An effort has also been made to have a peep into their future

group of children to another They observe the child s total acceptance of the consensus rules and describe the moral pressure of the group on the individual Piaget proceeds to an analysis of lying cheating adult authority punishment and responsibility noting and evaluating the changing attitudes of growing children toward these moral realities The book concludes with a comparison of the findings of this significant study with those theories in social psychology and sociology that bear directly on the moral development of the child
