**S**ino Biological is a global leader in the production and supply of effective, high-quality biologics, including monoclonal antibodies, cytokines, and CAR-T cells. The company specializes in monoclonal antibodies and antibody development that can provide fast service (MS) solution to the pharmaceutical, biotechnology, diagnostic, academic and academic research institutions.

With proprietary technologies and methodologies, Sino Biological has developed the world's largest collection of monoclonal proteins with a total of 1,000 lines, 1,000 cell strains and manufactured in proprietary expression systems that can help researchers produce their desired soluble protein, fusion protein, antibody, and antibody-drug conjugates. The company's proprietary expression systems have been successfully developed for various therapeutic targets like CD137 and CD137L cell therapies, cytokines and receptors, and viral antigens.

Sino Biological has mastered the art of manufacturing difficult proteins through the state-of-the-art Sino Biological protein expression systems such as culture, downstream targets with high efficiency in mammalian cells that have every other option in place to meet the diverse needs of customers. To produce challenging targets such as toxins and cell proteins, the company develops their own bio-recombinant expression system. By employing their technologies such as cell-free systems, the company can produce a variety of membrane proteins. Their 1000-line collection enables Sino Biological to quickly identify genes that encode

of high-quality proteins and antibodies within a short turnaround time. These proprietary technologies and infrastructure have helped to create a high impact in cancer immunotherapy research and clinical development.

**With proprietary expression platforms and high-throughput and scale-up capabilities, Sino Biological can successfully develop responsive targeting cancer immunotherapy, no matter how difficult the project is.**

All proprietary expression platforms are high-throughput and scale-up capabilities. This through-out successfully enables targets targeting cancer immunotherapy to make sure about the project.

The capability of manufacturing high quality monoclonal proteins, particularly through our proprietary mammalian cell expression platform, has given our customers the highest opportunity in discovery of various other identifying a target or a receptor or a ligand of interest to their business. Our Customer Officer at Sino Biological

Since Sino Biological specializes in manufacturing proteins in large quantities, a low impact service partner relationship according to their quality, quantity and economically requirements. For instance, a client who focuses on developing cancer immunotherapy

therapeutics are interested in identifying a panel of effective response biomarkers and corresponding antibodies of a series line of cancer for research and development. Sino Biological offered its expertise as a clinical research organization and succeeded in providing the panel of biomarker proteins that can be used for gene selection for the start-up of their own antibody-based products and therapies. Being a part of various clinical trials, Sino Biological manufactures high quality monoclonal antibodies for research and clinical development.
