**William L. Rowe on Philosophy of Religion** William L. Rowe, Nick Trakakis, 2017-05-15 William Rowe is one of the leading thinkers in contemporary philosophy of religion. Although he is best known for his contributions to the problem of evil, he has produced innovative and influential work across a wide array of subjects at the interface between philosophy and religion. He has, for example, written extensively on the existentialist theologian Paul Tillich on the challenging problem of divine freedom and on the traditional arguments in support of the existence of God. His work in these areas is distinguished by its clarity, rigour, originality, and sensitivity towards the claims of his theistic opponents. Indeed, Rowe's work has played a pivotal role in the remarkable revival of analytic philosophy of religion since the 1970s. The present collection brings together for the first time Rowe's most significant contributions to the philosophy of religion. This diverse but representative selection of Rowe's writings will provide students, professional scholars, as well as general readers with stimulating and accessible discussions on such topics as the philosophical theology of Paul Tillich, the problem of evil, divine freedom, arguments for the existence of God, religious experience, life after death, and religious pluralism.

***How History Gets Things Wrong*** Alex Rosenberg, 2019-08-13 Why we learn the wrong things from narrative history and how our love for stories is hard-wired. To understand something, you need to know its history. Right? Wrong, says Alex Rosenberg in *How History Gets Things Wrong*. Feeling especially well-informed after reading a book of popular history on the best-seller list, Don't Narrative History is always, always wrong. It's not just incomplete or inaccurate but deeply wrong, as wrong as Ptolemaic astronomy. We no longer believe that the earth is the center of the universe. Why do we still believe in historical narrative? Our attachment to history as a vehicle for understanding has a long Darwinian pedigree and a genetic basis. Our love of stories is hard-wired. Neuroscience reveals that human evolution shaped a tool useful for survival into a defective theory of human nature. Stories historians tell, Rosenberg continues, are not only wrong but harmful. Israel and Palestine, for example, have dueling narratives of dispossession that prevent one side from compromising with the other. Henry Kissinger applied lessons drawn from the Congress of Vienna to American foreign policy with disastrous results. Human evolution improved primate mind-reading: the ability to anticipate the behavior of others, whether predators, prey, or cooperators, to get us to the top of the African food chain. Now, however, this hard-wired capacity makes us think we can understand history: what the Kaiser was thinking in 1914, why Hitler declared war on the United States by uncovering the narratives of what happened and why. In fact, Rosenberg argues, we will only understand history if we don't make it into a story.
