the Restoration playhouses in order to demonstrate how theatrical conditions spurred authors into creating new forms of
tragedy comedy and opera the techniques of which anticipated the ideas of gestus and alienation first articulated by Bertold
Brecht in the 20th century The book explores the ways in which the theories of the time affected the practice showing the
crucial importance of Dryden s work in the playhouse and of the collaboration of authors and theatre companies It examines
particular texts to highlight the themes and present the spectrum of dramatic experience in action The book which is
extensively illustrated also shows how the Restoration style although developed by particular actors and dramatists declined
under the commercial pressures of the end of the century
