Brooks,2019-07-09 This book is recommended reading for planners preparing to take the AICP exam In this new book the author bridges the gap between theory and practice The author describes an original approach Feedback Strategy that builds on the strengths of previous planning theories with one big difference it not only acknowledges but welcomes politics the bogeyman of real world planning Don t hold your nose or look the other way the author advises planners but use politics to your own advantage The author admits that most of the time planning theory doesn t have much to do with planning practice These ideas rooted in the planner s real world are different This strategy employs everyday poltiical processes to advance planning trusts planners personal values and professional ethics and depends on their ability to help clients articulate a vision This volume will encourage not only veteran planners searching for a fresh approach but also students and recent graduates dismayed by the gap between academic theory and actual practice      *American Lumberman* ,1917

Posen, 2014-06-03 The United States Barry R Posen argues in *Restraint* has grown incapable of moderating its ambitions in international politics Since the collapse of Soviet power it has pursued a grand strategy that he calls liberal hegemony one that Posen sees as unnecessary counterproductive costly and wasteful Written for policymakers and observers alike *Restraint* explains precisely why this grand strategy works poorly and then provides a carefully designed alternative grand strategy and an associated military strategy and force structure In contrast to the failures and unexpected problems that have stemmed from America's consistent overreaching Posen makes an urgent argument for restraint in the future use of U S military strength After setting out the political implications of restraint as a guiding principle Posen sketches the appropriate military forces and posture that would support such a strategy He works with a deliberately constrained notion of grand strategy and even more important of national security which he defines as including sovereignty territorial integrity power position and safety His alternative for military strategy which Posen calls command of the commons focuses on protecting U S global access through naval air and space power while freeing the United States from most of the relationships that require the permanent stationing of U S forces overseas
