The Wooden Spaceships:

The Wooden Spaceships Bob Shaw, 2012-10-22 Twenty four years have passed since Toller Maraquine led the population of Land to the sister planet of Overland. Somehow those left behind have become immune to the deadly pterthacosis which caused the exodus and their voracious ruler now lays claim to Overland. Grudgingly put in charge of his planet's defence, Toller designs a front line force of spaceships and satellites made of wood which will engage the enemy fleet in the cold vastness of space before the invaders can set foot upon Overland. As the war proceeds, a far more deadly alien menace makes itself known which will threaten the entire existence of Overland. The Wooden Spaceships Bob Shaw, 1988 Science fiction roman

The Ragged Astronauts Bob Shaw, 1987-01 One planet faces a threat to its survival and so the only hope for its people is to migrate through space by balloon to a sister planet Overland. The sequel is The Wooden Spaceships

Children of the Comet Donald Moffitt, 2015-10-13 From the visionary author of *The Genesis Quest*, a wildly imaginative Greg Bear science fiction novel about a young man's struggle for survival on a comet made of ice. In Donald Moffitt's brilliant cosmic adventure, Torris, son of the Facemaker, knows only his small community at the base of the great Tree on a comet with almost no gravity or atmosphere. Torris's daily struggle for survival includes harvesting frozen air to keep breathing, dodging flutterbeasts and hunting meatbeasts for food. When the time comes to make his vision quest to the top of the Tree, Torris is completely unprepared for what he finds: a thieving and hostile fellow quester Ning, a female hunter in search of food to save her family on a neighboring comet, and humans from a massive starship that has spent billions of years crossing the galaxy from Earth's solar system. Perfect for fans of Arthur C. Clarke, Larry Niven, and Peter F. Hamilton, *Children of the Comet* is an enthralling space odyssey about a young man grappling with unexpected cultural differences and learning to adapt in the face of an uncertain and rapidly changing fantastical future.

Bob Shaw SF Gateway Omnibus Bob Shaw, 2013-08-15 From the vaults of The SF Gateway, the most comprehensive digital library of classic SFF titles ever assembled, comes an ideal introduction to the work of the award-winning Bob Shaw. Best known for his extraordinary novel of slow glass *Other Days, Other Eyes*, Bob Shaw was a fan favourite at conventions for his hysterical, serious scientific talks. This omnibus contains three of his finest works: *Orbitsville*, *A Wreath of Stars*, and *The Ragged Astronauts*. *Orbitsville*: Racing from the certain vengeance of Earth's tyrant ruler, space captain Vance Garamond flees the Solar System and discovers the almost unimaginably vast spherical structure soon to become famous as Orbitsville, a new home for Earth's huddled masses. *A Wreath of Stars*: Thornton's Planet is an anti-neutrino planet detected on its approach to Earth. It can be seen only through the newly developed magniluct lenses, and its arrival causes a wave of panic. When its course carries it past the earth, interest in Thornton's Planet wanes. But the visit of Thornton's Planet has had effects on Earth, further ranging than anyone could have imagined. *The Ragged Astronauts*: Land and Overland, twin worlds a few thousand miles apart. On Land, humanity faces a threat to its very survival: an airborne species, the ptertha, has declared war on humankind and is actively hunting for victims.

The only hope lies in migration Through space to Overland By balloon [Complete Critical Assembly](#) David Langford,2002-10-01 This new collection of essays commissioned from a range of scholars across the world takes as its theme the reception of Rome s greatest poet in a time of profound cultural change Amid the rise of Christianity the changing status of the city of Rome and the emergence of new governing classes Vergil remained a bedrock of Roman education and identity This volume considers the different ways in which Vergil was read understood and appropriated by poets commentators Church fathers orators and historians The introduction outlines the cultural and historical contexts Twelve chapters dedicated to individual writers or genres and the contributors make use of a wide range of approaches from contemporary reception theory An epilogue concludes the volume

Space for Peace Richard Howard,2021-02-01 Science fiction might not be the first thing that springs to mind when we think of Irish literature But in the post war period in Belfast two authors Bob Shaw and James White began producing science fiction stories eventually selling them to international markets and gaining the respect of luminaries such as Arthur C Clarke Brian Aldiss and Stanley Kubrick Although lauded in the international science fiction scene for their innovations in the genre Shaw and White s work has been relatively ignored within Irish Studies This book connects the emergence of science fiction in Belfast with the position of the city as the locus of technological development on the island of Ireland and the development of a corresponding technological imaginary Breaking new ground in the study of Irish modernity Richard Howard draws parallels between the narratives of Shaw and White and the persistent influence of historical narratives embodied by the two traditions paradigm in the region as well as exploring the figure of the alien both in science fiction and in the history of Northern Ireland He also considers the works of Shaw and White as utopian gestures against the backdrop of the Irish Troubles finding both repressive and redemptive elements therein The book makes an important contribution to the growing conversation about Irish science fiction and our understanding of modernity in Ireland
