The Young Voter:

The Young Voter John J. Patrick, Allen D. Glenn, 1972 **Is Voting for Young People?** Martin P. Wattenberg, 2024-03-29

Is Voting for Young People explores the reasons why young people are less likely to follow politics and vote in the United States and other established democracies no matter who the candidates are or what the issues may be This brief accessible and provocative book suggests ways of changing that Fully updated to include statistics and analysis from the 2020 and 2022 US elections this book argues that politics and voting have increasingly become the province of the elderly with a growing rift between politicians and young adults that weakens democracy Employing a wealth of cross national data Martin P Wattenberg shows how changes in media consumption neglect from politicians and changing attitudes towards civic duty have created a generation gap in voter turnout and ceded important decisions on youth concerns to those who have different values and interests Illustrating the critical importance of engaging young voters this book is an important read for students of democracy political participation elections and voter behavior **Youth to Power** Michael Connery, 2008 An examination of how today s young people are combining technology with a vigorous social spirit to revive progressive politics In addition to recounting the history of American youth politics since its emergence in the 1972 election the book features interviews with many of the major figures in the youth political movement and identifies strategies that the Democratic Party can use to capitalise on its new advantages with young voters Youth to Power is a must read for anyone who wants to understand the political and cultural future of America The Galvanization of the Young Vote in the 2008 Presidential Election Glenn L. Starks, 2009-11-11 In 2008 the United States stood poised to possibly elect its first African American president This fact coupled with the economic and political climate of the nation galvanized young voters and led to one of the highest youth voter turnout rates in history The renewed enthusiasm of young voters creates a unique situation in the United States as the current level of political excitement and voting efficacy of this age bracket can be used to benefit future presidential state and local elections In The Galvanization of the Young Vote in the 2008 Presidential Election Starks explores the factors that led to a surge in youth voting and outlines strategies for political parties to continue attracting young voters to the polls

Taking Back the Vote Jane Eisner, 2004-08-27 Young people are volunteering in record numbers but many of them don't vote Why In Taking Back the Vote respected journalist and political commentator Jane Eisner analyzes this decline in voter participation and suggests concrete ways of reinvigorating our youth to get out and vote Eisner uses the historic 1972 legislation that gave eighteen year olds the right to vote as a starting point in her book then she traces how and why young people have slowly stopped voting since that time But Eisner asserts that this trend of declining voter and political participation can be reversed and it is up to parents teachers coaches and others to make that happen Civic education Eisner feels is the key to bringing young people back into the voting booths High schools in particular need to be offering civic education in the same way that they offer music math or sports education Registering to vote needs to be easier The act of

voting needs to be more fully recognized by society perhaps through something like a First Vote ritual which would mark a young person's coming of age as a voter Filled with moving stories of kids becoming engaged as citizens as well as information for young people as they begin their civic involvement Taking Back the Vote an inspiring resource for parents teachers community leaders and all mentors who recognize the importance of empowering new voters

Making Young Voters John B. Holbein, D. Sunshine Hillygus, 2020-02-20 In 2016 90% of young Americans reported an interest in politics 80% intended to vote Yet only 43% of people between the ages of 18 and 29 ended up actually casting a ballot Making Young Voters investigates what lies at the core of this gap The authors in depth interdisciplinary approach reveals that political apathy is not the reason for low levels of youth turnout Rather young people too often fail to follow through on their political interests and intentions Those with noncognitive skills related to self regulation are more likely to overcome internal and external barriers to participation This book combines theory from psychology economics child development and more to explore possible solutions rooted in civic education and electoral reform This potentially paradigm shifting contribution to the literature of American politics serves to influence not only our understanding of voter turnout but also the fundamental connections between the education system electoral institutions and individual civic behavior in a democracy How young people vote affects not only each individual future but that of the United States and of us all

Young People's Voting Behaviour in Europe Nicola Maggini, 2016-10-31 This book uses various concepts of age to examine young people's voting behaviour in six European countries between 1981 and 2000 It addresses questions such as what are the determinants of voting choices among young people and to what extent are these factors different from those of adults Through an innovative approach aimed at studying party choice with a strong empirical orientation the author argues that age is less important in influencing voting choices than having been young and socialized to politics in a given historical period Ultimately values and political factors explain young people's voting choices more than social identities which marks a change from previous generations This book will appeal to students and scholars in comparative politics electoral behaviour party politics and political sociology

Youth Voter Participation, 1999 The importance of the youth vote to any democracy is central to this cross cultural analysis of the unique role of elections and the dangers of abstention in a democratic society Comparative data from the parliamentary elections of 15 European democracies illustrate the scope of the problem of low youth turnout and analyses of the reasons for such negligible participation are presented Specially commissioned interviews conducted in several countries worldwide bring the opinions and views of young people themselves into the study Additionally descriptions of specific programmes for increasing youth participation enacted in Chile Russia South Africa and the United States and included as are proposals for a variety of activities that governmental and nongovernmental organizations can use to draw young citizens into the electoral arena

[Encyclopedia of Political Communication](#) Lynda Lee Kaid, Christina Holtz-Bacha, 2008 Political communication began with the earliest studies of democratic discourse by Aristotle and Plato

Pomante (II),2016 Since Converse's work in 1971 political scientists have noted the abysmal level of participation by young Americans on Election Day One possible reason for the negative comments by academics is their assumption that young people will react to socio political and economic contexts in the same manner as other segments of the voting population A second possible explanation for the negative reports is that not all relevant variables which explain deviation in youth mobilization levels have been

uncovered The research reported herein explores potential American voters between the ages of 18 to 24 with an eye toward uncovering unique explanations for their lower levels of mobilization and possible new variables that others have failed to consider Specifically the research demonstrates three ways in which younger voters are different from the voting population 25 years of age and older For instance it is widely recognized that economic hardship can influence democratic participation rates this research uncovers evidence to suggest a traditional definition of unemployment is not the best measure for capturing the economic hardship of young Americans With a new measure of unemployment which includes discouraged workers and the underemployed I learn that the youngest age group is mobilized to vote Older individuals on the other hand continue to associate with lower participation rates when economic hardship is higher Second the research uncovers the overall detrimental effects of state laws which raise the relative costs of voting The research develops a wholly new Cost of Voting Index COVI to capture these effects Surprisingly it does not appear that the COVI places any additional burden on young Americans but it is clear that everyone participates less when the costs of voting increase Third using a classic experimental research design and in depth analyses of a dozen real world elections I uncover evidence in support of a previous unconsidered variable Explicitly I learn that the age of candidates running for public office is a sufficient condition to mobilize youth to cast a ballot on Election Day

Lowering the Voting Age to 16 Jan Eichhorn, Johannes Bergh, 2019-11-27 This book explores the consequences of lowering the voting age to 16 from a global perspective bringing together empirical research from countries where at least some 16 year olds are able to vote With the aim to show what really happens when younger people can take part in elections the authors engage with the key debates on earlier enfranchisement and examine the lead up to and impact of changes to the voting age in countries across the globe The book provides the most comprehensive synthesis on this topic including detailed case studies and broad comparative analyses It summarizes what can be said about youth political participation and attitudes and highlights where further research is needed The findings will be of great interest to researchers working in youth political socialization and engagement as well as to policymakers youth workers and activists

Electoral Politics in India Suhas Palshikar, Sanjay Kumar, Sanjay Lodha, 2017-02-03 This important volume explains not only the startling victory of the Bharatiya Janata Party BJP but also the equally surprising downfall of the Congress Party It examines not why BJP won and the Congress lost but why the scale of BJP s victory and that of Congress s defeat was so very different from the results in the years 2004 and 2009 The volume presents an in depth analysis of the electoral results state wise studies the factors leading up to these outcomes and the road India has travelled since then

The Kids Are All Left David Faris, 2020-06-30 A brewing generational shift is about to change politics and our country forever A demographic apocalypse is coming for the Republican Party The surge in young voters for Biden in 2020 was only the beginning Not only do they overwhelmingly favor the left but the margins are at such an unprecedented and overwhelming scale that these voters are poised to end the partisan gridlock that has characterized

politics for over thirty years In *The Kids Are All Left* political scientist David Faris proves beyond any doubt that this isn't just a typical generational trend that will even out over time and explores the policy transformations that young Americans will pursue He offers hope for an escape from the political stalemate that has twice this century sent the loser of the popular vote to the White House but he is realistic about the institutional obstacles that stand between voters and true majority rule The result is a first look at what American politics will look like in the 21st century **College Mercury** ,1880 *Is Voting for Young People?* Martin P. Wattenberg,2020 In 2016 Hillary Clinton managed to win the Democratic nomination despite losing young voters to Bernie Sanders by a margin of 73 to 26 percent The fact that senior citizens were four times more likely to vote in the primaries than young people enabled her to survive her lack of youth appeal But in the general election Clinton's problems with young people turned into her Achilles heel Young people failed to come out to vote as much as she needed or to support her in sufficient numbers when they did vote What will happen in 2020 another history making election Already in late 2019 journalists are referring to the generation gap as the most important divide among Democratic voters *Is Voting for Young People* explores the reasons why young people are less likely to follow politics and vote in the United States as well as in many other established democracies no matter who the candidates are or what the issues may be This brief accessible and provocative book suggests ways of changing that For the first time since its original publication in 2006 each chapter has been thoroughly updated to reflect the most recent available data New to the Fifth Edition For the first time since its original 2006 publication the entire text has been updated with the most recent available data and analysis A new chapter has been added *Young People and Politics in the Trump Era* New chapter opening vignettes illustrate one of the key points in each chapter **The Woman Voter** Florence Woolston,Mary Ritter Beard,1915 **Puck** ,1884 California.
