Their Own Voices:

A Pedagogy of Possibility Kay Halasek, 1999 The author reconceives composition studies from a Bakhtinian perspective focusing on both the discipline's theoretical assumptions and its pedagogies Halasek explores the implications of Bakhtin's work and provides a model of scholarship balanced between practice and theory

The African Diaspora Isidore Okpewho, Carole Boyce Davies, Ali Al'Amin Mazrui, 1999 How black people established their identities in the African diaspora

The Structure and Development of Self-Consciousness Dan Zahavi, Thor Grünbaum, Josef Parnas, 2004-09-23 Self-consciousness is a topic of considerable importance to a variety of empirical and theoretical disciplines such as developmental and social psychology cognitive neuroscience psychiatry and philosophy This volume presents essays on self-consciousness by prominent psychologists cognitive neurologists and philosophers Some of the topics included are the infant's sense of self and others theory of mind phenomenology of embodiment neural mechanisms of action attribution and hermeneutics of the self A number of these essays argue in turn that empirical findings in developmental psychology phenomenological analyses of embodiment or studies of pathological self-experiences point to the existence of a type of self-consciousness that does not require any explicit I thought or self-observation but is more adequately described as a pre-reflective embodied form of self-familiarity The different contributions in the volume amply demonstrate that self-consciousness is a complex multifaceted phenomenon that calls for an integration of different complementary interdisciplinary perspectives Series B

That Book Is Dangerous! Adam Szetela, 2025-08-12 An alarming exposé of the new challenges to literary freedom in the age of social media when anyone with an identity and an internet connection can be a censor In *That Book Is Dangerous* Adam Szetela investigates how well-intentioned and often successful efforts to diversify American literature have also produced serious problems for literary freedom Although progressives are correct to be focused on right-wing attempts at legislative censorship Szetela argues for attention to the ways that left-wing censorship controls speech within the publishing industry itself The author draws on interviews with presidents and vice presidents at the Big Five publishers literary agents at the most prestigious agencies award-winning authors editors marketers sensitivity readers and other industry professionals to examine the new publishing landscape What he finds is unsettling mandatory sensitivity reads morality clauses in author contracts even censorship of dangerous books in the name of antiracism feminism and other forms of social justice These changes to acquisition practices editing policies and other aspects of literary culture are a direct outgrowth of the culture of public outcries on X Goodreads Change.org and other online platforms where users accuse authors justifiably or not of racism sexism homophobia and other transgressions But rather than genuinely address the economic inequities of literary production this current moral crusade over literature serves only to entrench the status quo While the right is remaking the world in its image he writes the left is standing in a circular firing squad Compellingly argued and incisively written the book is a much-needed wake-up call for anyone who cares about reading writing and the

publication of books as well as the generations of young readers we are raising

Consciousness and Self-Regulation

Gary Schwartz, 2012-12-06 The first and foremost concrete fact which every one will affirm to belong to his inner experience is the fact that consciousness of some sort goes on I William James 1893 We are witnessing today a mounting interest among behavioral and biological scientists in problems long recognized as central to our understanding of human nature yet until recently considered out of the bounds of scientific psychology and physiology Sometimes thrown into the heading of altered states of consciousness this growing research bears directly upon such time honored questions as the nature of conscious experience the mind body relationship and volition If one broadly views this research as encompassing the two interrelated areas of consciousness and self regulation one can find many relevant contemporary examples of creative and experimentally sophisticated approaches including research on the regulation of perception and sensory experience attention imagery and thinking emotion and pain hypnosis and meditation biofeedback and voluntary control hemispheric asymmetry and specialization of brain function drug induced subjective states and biological rhythms Because the material is spread over many different kinds of publications and disciplines it is difficult for anyone person to keep fully abreast of the significant advances The overall aim of the new Plenum Series in Consciousness and Self Regulation Advances in Research is to provide a scholarly forum for discussing integration of these diverse areas by presenting some of the best current research and theory
