Themans Wake:

Religion, Politics and Dissent, 1660-1832 Robert D. Cornwall, 2016-04-15 The idea of the long eighteenth century 1660 1832 as a period in which religious and political dissent were regarded as antecedents of the Enlightenment has recently been advanced by several scholars The purpose of this collection is further to explore these connections between religious and political dissent in Enlightenment Britain Addressing the many and rich connections between political and religious dissent in the long eighteenth century the volume also acknowledges the work of Professor James E Bradley in stimulating interest in these issues among scholars Contributors engage directly with ideas of secularism radicalism religious and political dissent and their connections with the Enlightenment or Enlightenments together with other important themes including the connections between religious toleration and the rise of the enlightenments Contributors also address issues of modernity and the ways in which a modern society can draw its inspiration from both religion and secularity as well as engaging with the seventeenth century idea of the synthesis of religion and politics and its evolution into a system in which religion and politics were interdependent but separate Offering a broadly conceived interpretation of current research from a more comprehensive perspective than is often the case the historiographical implications of this collection are significant for the development of ideas of the nature of the Enlightenment and for the nature of religion society and politics in the eighteenth century By bringing together historians of politics religion ideas and society to engage with the central theme of the volume the collection provides a forum for leading scholars to engage with a significant theme in British history in the long eighteenth century
