Theology And Scientific Knowledge:

Theology and Scientific Knowledge Christopher F. Mooney,1996 Towards the end of his life the author concentrated on his early interests in religion and science learning of developments in modern physics and science The essays in this book represent that work mapping out a number of scientific issues relevant to both scientists and theologians Amazon com

The Big Questions in Science and Religion Keith Ward,2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers

Theology as Science and Its Present Position and Prospects in the Reformed Church William Hastie,1899 Reality and Scientific Theology Thomas F. Torrance,2001-11-28 In this book the author argues for a rigorous scientific theology under the double constraint of the reality of God and the reality of the world of space and time Careful attention is given to the common commitment of theological and natural science to objective knowledge and the deeply natural relation between knowledge of God the Creator and knowledge of the world he has made Stress is laid upon the stratified structure of theology and the need for a radical simplification and unification of Christian doctrine Is theology the science of God and is it concerned with objective knowledge like natural science Is there a natural theology and how is it related to knowledge of God through divine relation How is the community of faith within which dogmatic theology arises related to the social coefficient of scientific inquiry What is the place of mysticism and of art in theology Does theology have a special notion of truth and does it have its own inner logic and structure These are some of the main questions which this book seeks to answer

New Directions in Theology and Science Peter Harrison,Paul Tyson,2022-01-31 This book sets out a new agenda for science theology interactions and offers examples of what that agenda might look like when implemented It explores in innovative ways what follows for science theology discussions from recent developments in the history of science The contributions take seriously the historically conditioned nature of the categories science and religion and consider the ways in which these categories are reinforced in the public sphere Reflecting on the balance of power between theology and the sciences the authors demonstrate a commitment to moving beyond traditional models of one sided dialogue and seek to give theology a more active role in determining the interdisciplinary agenda

A Christian Theology of Science Paul Tyson,2022-08-16 An

author on the cutting edge of today's theology and science discussions argues that creedal Christianity has much to contribute to the ongoing conversation This book contains an intellectual history of theology's engagement with science during the modern period critiques current approaches and makes a constructive proposal for how a Christian theological vision of natural knowledge can be better pursued The author explains that when Christians treat theology as their first truth discourse it is good for both science and religion Foreword by David Bentley Hart

Theology as an Empirical Science Douglas Clyde Macintosh, 2013-05-02 Investigating the question can theology description of the divine reality be made truly scientific this book addresses logic and human knowledge alongside experimental religion An important philosophic work by a prolific theologian also known for his later court case regarding conscientious objection this book describes how it is possible to relate theological theory with religious experience of the divine the way that the sciences relate to human acquaintance with things and people in social experience

American Journal of Theology, 1906 Vols 2-6 include Theological and Semitic literature for 1898-1901 a bibliographical supplement to the American journal of theology and the American journal of Semitic languages and literatures By W Muss Arnolt Separately paged

Science, Religion(s), and Spirit(s) in China Jacob Chengwei Feng, 2025-12-08 What happens when the earliest Christian missionaries to China encounter advanced Tang science Daoism and the power of qi This groundbreaking book takes you inside the lost world of Jingjiao the Luminous Teaching Religion uncovering how these East Syriac missionaries expressed the Holy Spirit through Chinese metaphors of breath and wind With a fresh English translation of the full Tang Jingjiao corpus some never before translated with such nuance you explore a rich constructive theology of creation shaped by interreligious dialogue and scientific insight Blending theology Daoism and Quantum Field Theory the book introduces Embodied Critical Realism as a bold new method for theology science religion dialogue Read it and rethink Chinese theology for the third millennium

A Christian Theology of Science Paul Tyson, 2022-08-16 An author on the cutting edge of today's theology and science discussions argues that creedal Christianity has much to contribute to the ongoing conversation This book contains an intellectual history of theology's engagement with science during the modern period critiques current approaches and makes a constructive proposal for how a Christian theological vision of natural knowledge can be better pursued The author explains that it is good both for religion and for science when Christians treat theology as their first truth discourse Foreword by David Bentley Hart

The Role of Theology in the History and Philosophy of Science Joshua M. Moritz, 2017-11-13 After a bibliographic introduction highlighting various research trends in science and religion Joshua Moritz explores how the current academic and conceptual landscape of theology and science has been shaped by the history of science even as theology has informed the philosophical foundations of science The first part assesses the historical interactions of science and the Christian faith looking at the cases of human dissection in the Middle Ages and the Galileo affair in order to challenge the common notion that science and religion have always been at war Part two investigates the nature of the

interaction between science and Christian theology by exploring the role that metaphysical presuppositions and theological concepts have played and continue to play within the scientific process

Thoughts on Science, Theology, and Ethics
 John Wilson (M.A.), 1885 Toward a Christian View of a Scientific World George L. Murphy, 2001

Modern science and science based technology have changed traditional understandings of the world in profound ways A pastor who is also a trained scientist draws on his diverse background to help readers put today s scientific knowledge in the context of Christian faith Murphy sees the world described by today s science as the creation of God revealed in Jesus Christ and technology and modern medicine as ways to carry out God s purpose for the world This book is a useful tool for introducing readers to the crucial conversations and interactions now occurring between the fields of science theology technology and ethics It s a clear and accessible text that s appropriate for adult classes and lay groups of all levels This comprehensive and readable work by a well qualified and experienced scientist theologian and pastor fills a very important gap in the current literature regarding the new dialogue that has been emerging in recent years between science and religion It seeks to develop a Christian view of the world that is congruent with modern science It includes discussions of the practical and moral implications of issues such as genetic engineering and medicine and their implications for worship and prayer

David E Arthur Eden Theological Seminary George L Murphy is a Phi Beta Kappa graduate of Ohio University Johns Hopkins University where he earned a Ph D in physics and Wartburg Theological Seminary He has taught at the University of Western Australia Westminster College Luther College and Trinity Lutheran Seminary Widely published in both scientific and religious periodicals Murphy has received two awards from the Templeton Foundation for his papers on science and religion A Lutheran pastor Murphy is also the principal author of *Cosmic Witness* CSS *The American Journal of Theology* University of Chicago. Divinity School, 1910 Vols 2 6 include Theological and Semitic literature for 1898 1901 a bibliographical supplement to the American journal of theology and the American journal of Semitic languages and literatures By W Muss Arnolt Separately paged

Dissertations for the Doctorate in Sacred Theology Catholic University of America, 1895 *Philosophical Theology: The soul & its faculties* Frederick Robert Tennant, 1928 Encyclopaedia of Religion and Ethics James Hastings, John Alexander Selbie, Louis Herbert Gray, 1922 Modern Natural Science in Service to Catholic Theology Jordan A. Haddad, 2022

The Catholic Church composed as she is of a vast body of believers has frequently engaged with and positively made use of the natural scientific and philosophical knowledge of the day down through the ages From St Augustine to St Thomas Aquinas to Pope St John Paul II the greatest figures of the Catholic intellectual tradition have always recognized to varying degrees and in various ways that all truth is from God and that the knowledge known by divine revelation and in faith is in some sense inwardly open to the insights of natural reason When it comes to natural scientific knowledge in particular the question is not whether it can positively contribute to the practice of Catholic theology but why and how this is the case which this dissertation seeks to do in a systematic manner This dissertation self consciously places itself not only within the

long tradition of Catholic engagement with natural scientific knowledge but more specifically at the contemporary moment of the living Tradition In so doing it draws particularly on the insights of 19th and 20th century theologians and philosophers in conjunction with the wisdom of Augustine and Aquinas for fresh insights as to why Catholic theology as an historically conditioned discipline primarily concerned with understanding God and the whole of creation in light of divine revelation can and even in certain circumstances should be open to the insights of the natural sciences To justify this positive contribution on behalf of the natural sciences this dissertation presents a realist account of natural scientific knowledge broadly considered that is nonetheless open to future progress and development and addresses some of the more pertinent objections to realism and progress found in 20th century philosophy of science literature The final two chapters of this project build upon the preceding two by proposing a theologically and philosophically rigorous approach to understanding why natural scientific knowledge can positively contribute to the practice of Catholic theology by virtue of its subject object and context and by offering five proposals as to how this has already taken place and most likely will take place in the future These five ways are 1 by clarifying the content of divine revelation 2 by providing the material substrate for theological synthesis 3 by purifying and improving theological reasoning 4 by raising new questions for theological reflection and 5 by better relating the Book of Nature to the Book of Revelation By providing this constructive account of the contribution of natural scientific knowledge to Catholic theology the Augustinian paradigm is furthered developed and John Paul II s clarion call for theologians to more deeply explore how the natural sciences can positively contribute to Catholic theology is answered
