Theophrastean Studies:

Theophrastean Studies William W. Fortenbaugh, 2003 Theophrastus of Eresus was Aristotle's successor as head of the Peripatetic School. He is best known for a humorous collection of character sketches but his importance in antiquity and for the history of thought in general is much greater. He was the founder of systematic botany and his work on logic went well beyond that of Aristotle as did his interest in rhetoric and poetics. He was the first to collect the laws of different city states and in ethics he emphasized manners as well as moral virtue. In recent years his importance has been more fully appreciated through the efforts of Professor William Fortenbaugh who founded Project Theophrastus, an international undertaking whose goal has been to collect, edit, and comment on the fragments of Theophrastus. While leading this project, Professor Fortenbaugh has been writing on Theophrastus, highlighting his achievements and making connections between areas like logic and rhetoric, psychology and religion, ethics and politics. The present volume brings together for the first time twenty-two of his essays.

Harvard Studies in Classical Philology, 1917 *Routledge History of Philosophy Volume II* David Furley, 2003-09-02 The final volume to be published in the acclaimed Routledge History of Philosophy series provides an authoritative and comprehensive survey and analysis of the key areas of late Greek and early Christian Philosophy. From Aristotle to Augustine David J. Furley, 1999 This volume provides a comprehensive survey and analysis of the key areas of late Greek and early Christian Philosophy written by experts in the field.

The subject of this volume is Strato of Lampsacus in Mysia on the Hellespont. Strato was the third head of the Peripatetic School after Aristotle and Theophrastus. He succeeded the latter in c. 286 BCE and was in turn succeeded by Lyco of Troas in c. 268 BCE. Diogenes Laertius describes Strato as a distinguished person who became known as the physicist because more than anyone else he devoted himself to the careful study of nature. Strato's concern with the physical world is well attested by the titles of his books: *On the Void*, *On the Heaven*, and *On the Wind*. His other books point to a keen interest in human physiology, animal life, and diseases. But it would be a mistake to think that Strato was uninterested in other areas of philosophic concern. Indeed, he wrote works on logic, first principles, theology, politics, and ethics. None of this work survives intact, but the reports that have come down to us reveal much of present-day interest. Included is a new and complete edition of the ancient sources together with a critical apparatus to the ancient texts, an English translation, and notes to the translation.
