Ucko, 2005-08-10 *Theory in Archaeology* tackles important questions about the diversity in archaeological theory and practice which face the discipline in the 1990s What is the relationship between theory and practice How does World archaeological theory differ from European Can one be a good practitioner without theory This unique book brings together contributors from many different countries and continents to provide the first truly global perspective on archaeological theory They examine the nature of material culture studies and look at problems of ethnicity regionalism and nationality They consider too another fundamental of archaeological inquiry can our research be objective or must the past always be a relativistic construction Theory in Archaeology is an important book whose authors bring together very different perceptions of the past Its wide scope and interest will attract an international readership among students and academics alike **Archaeological Theory** Matthew

Handbook of Archaeological

Theories R. Alexander Bentley,Herbert D. G. Maschner,Christopher Chippindale,2007-11-09 This handbook gathers original authoritative articles from leading archaeologists to compile the latest thinking about archaeological theory The authors provide a comprehensive picture of the theoretical foundations by which archaeologists contextualize and analyze their archaeological data Student readers will also gain a sense of the immense power that theory has for building interpretations of the past while recognizing the wonderful archaeological traditions that created it An extensive bibliography is included This volume is the single most important reference for current information on contemporary archaeological theories

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Archaeological Theory Norman Yoffee, Andrew Sherratt, 1993-07-22 This volume assesses the real achievements of archaeology in increasing an understanding of the past Without rejecting the insights either of traditional or more recent approaches it considers the issues raised in current claims and controversies about what is appropriate theory for archaeology The first section looks at the process of theory building and at the sources of the ideas employed The following studies examine questions such as the interplay between expectation and evidence in ideas of human origins social role and material practice in the formation of the archaeological record and how the rise of states should be conceptualised further papers cover issues of ethnoarchaeology visual symbols and conflicting claims to ownership of the past The conclusion is that archaeologists need to be equally wary of naive positivism in the guise of scientific procedure and of speculation about the unrecorded intentions of prehistoric actors [Reader in Archaeological Theory](#)

David S. Whitley, 1998 This Reader in Archaeological Theory presents sixteen articles of key theoretical significance in a format which makes this notoriously complex area easier for students to understand This volume

provides an intellectual history of different approaches to archaeology which contextualizes the complex traditions of cognitive archaeology and postprocessualism on which it focuses organizes theories of archaeology the meanings of things the prehistoric mind and cognition gender ideology and social theory and archaeology's relationship to today's society and politics includes lucid section introductions to each section which provide context explain why the papers are so significant and summarize their key points emphasizes research from the New World making archaeological theory especially relevant and accessible to students in North America

Method and Theory in American Archaeology Gordon R. Willey, Philip Phillips, 2001-02-14 A Dan Josselyn Memorial Publication This invaluable classic provides the framework for the development of American archaeology during the last half of the 20th century In 1958 Gordon R Willey and Philip Phillips first published *Method and Theory in American Archaeology* a volume that went through five printings the last in 1967 at the height of what became known as the new or processual archaeology The advent of processual archaeology according to Willey and Phillips represented a theoretical debate a question of whether archaeology should be the study of cultural history or the study of cultural process Willey and Phillips suggested that little interpretation had taken place in American archaeology and their book offered an analytical perspective the methods they described and the structural framework they used for synthesizing American prehistory were all geared toward interpretation *Method and Theory* served as the catalyst and primary reader on the topic for over a decade This facsimile reprint edition of the original University of Chicago Press volume includes a new foreword by Gordon R Willey which outlines the state of American archaeology at the time of the original publication and a new introduction by the editors to place the book in historical context The bibliography is exhaustive Academic libraries students professionals and knowledgeable amateurs will welcome this new edition of a standard maker among texts on American archaeology

Archaeological Theory and the Politics of Cultural Heritage Laurajane Smith, 2004 This is a much needed survey of how relationships between indigenous peoples and the archaeological establishment have got into difficulties and a pointer towards how things could move forward

Archaeological Theory Today Ian Hodder, 2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to external influences as well as the desire to contribute to wider debates The contributors

examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of *Archaeological Theory Today* will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally *Can There be a Philosophy of Archaeology?* William Harvey Krieger, 2006-01-01 *Can There Be a Philosophy of Archaeology* provides a historical and philosophical analysis of the rise and fall of the philosophical movement known as logical positivism focusing on the effect of that movement on the budding science of archaeology Significant problems resulted from the grafting of logical positivism onto what became known as processual or new archaeology and as a result of this failure archaeologists distanced themselves from philosophers of science believing that archaeology would be best served by a return to the dirt By means of a thorough analysis of the real reasons for failures of logical empiricism and the new archaeology as well as a series of archaeological case studies Krieger shows the need for the resumption of dialogue and collaboration between the two groups In an age where philosophers of science are just beginning to look beyond the standard examples of scientific practice this book demonstrates that archaeological science can hold its own with other sciences and will be of interest to archaeologists and philosophers of science alike **BELIEF IN THE PAST** David S Whitley, Kelley Hays-Gilpin, 2008-07-15 Human actions are often deeply intertwined with religion and can be understood in a strictly religious context Yet many volumes and articles pertaining to discussions of religion in the archaeological past have focused primarily on the sociopolitical implications of such remains The authors in this volume argue that while these interpretations certainly have a meaningful place in understanding the human past they provide only part of the picture Because strictly religious contexts have often been ignored this has resulted in an incomplete assessment of religious behavior in the past This volume considers exciting new directions for considering an archaeology of religion offering examples from theory tangible archaeological remains and ethnography

Archaeological Theory in Dialogue Rachel J. Crellin, Craig N. Cipolla, Lindsay M. Montgomery, Oliver J.T. Harris, Sophie V. Moore, 2020-11-09 *Archaeological Theory in Dialogue* presents an innovative conversation between five scholars from different backgrounds on a range of central issues facing archaeology today Interspersing detailed investigations of critical theoretical issues with dialogues between the authors the book interrogates the importance of four themes at the heart of much contemporary theoretical debate relations ontology posthumanism and Indigenous paradigms The authors who work in Europe and North America explore how these themes are shaping the ways that archaeologists conduct fieldwork conceptualize the past and engage with the political and ethical challenges that our discipline faces in the twenty first century The unique style of *Archaeological Theory in Dialogue* switching between detailed arguments and dialogical exchange makes it essential reading for both scholars and students of archaeological theory and those with an interest in the politics and ethics of the past *Research and Theory in Current Archeology* Charles L. Redman, 1973 *Archaeological*

Constructs J. C. Gardin, 1980-02-21 Jean Claude Gardin examines the practical questions of how archaeological information can best be recorded stored and disseminated **Theory and Explanation in Archaeology** Colin Renfrew, M. J. Rowlands, Barbara Abbott Seagraves, University of Southampton. Department of Archaeology, 1982
