

What is it? Meteor, comet or an asteroid?

Meteorite

Small piece of an asteroid or meteoroid that survives through Earth's atmosphere and lands on Earth's surface.

Meteor

Small pieces of rock, streak across the Earth's sky, commonly known as shooting stars.

Comet

Made of rock, ice and gas, orbits the Sun like an asteroid. Vaporized ice and debris makes the comet's tail.

Meteoroid

Small pieces that break off asteroids and comets made of rock or ice. About 3 feet in size.

Asteroid

A small rocky, iron or ice body which orbits the Sun. Most asteroids are found between Mars and Jupiter known as the Asteroid Belt.

From Meteorite Impact to Constellation City Oiva W. Saarinen, 2013-06-15 From Meteorite Impact to Constellation City is a historical geography of the City of Greater Sudbury The story that began billions of years ago encompasses dramatic physical and human events Among them are volcanic eruptions two meteorite impacts the ebb and flow of continental glaciers Aboriginal occupancy exploration and mapping by Europeans exploitation by fur traders and Canadian lumbermen

and American entrepreneurs the rise of global mining giants unionism pollution and re greening and the creation of a unique constellation city of 160 000 The title posits the book s two main themes one physical in nature and the other human the great meteorite impact of some 1 85 billion years ago and the development of Sudbury from its inception in 1883 Unlike other large centres in Canada that exhibit a metropolitan form of development with a core and surrounding suburbs Sudbury developed in a pattern resembling a cluster of stars of differing sizes Many of Sudbury s most characteristic attributes are undergoing transformation Its rocky terrain and the negative impact from mining companies are giving way to attractive neighbourhoods and the planting of millions of trees Greater Sudbury s blue collar image as a union powerhouse in a one industry town is also changing recent advances in the fields of health education retailing and the local and international mining supply and services sector have greatly diversified its employment base This book shows how Sudbury evolved from a village to become the regional centre for northeastern Ontario and a global model for economic diversification and environmental rehabilitation

Knowledge & Illustrated Scientific News ,1910 **Knowledge** ,1882 The Encyclopaedia Britannica: Index Eng to Zul ,1922 **The Encyclopedia Britannica** ,1922 **Transactions of the International Astronomical Union: Reports on Astronomy** C. de Jager,2012-12-06 This volume contains the fifteenth tri annual reports of the Presidents of the forty Commissions of the International Astronomical Union it refers to the progress in our discipline during the three years 1970 1971 and 1972 As compared to earlier volumes a gradual change in character is unmistakable The ever increasing flow of publications combined with the obvious necessity to keep the Reports at a reasonable size and price level has gradually forced the Commission Presidents to be more selective than before in drafting their Reports I have certainly stimulated them into that direction in order that Reports like these be valuable and lasting it seems imperative that the individual contributions have the character of a critical overall review where a fairly complete summary is given of the major develop ments and discoveries of the past three years and in which the broad developments and new trends be clearly outlined while at the same time essential problems for future research are identified With respect to the latter item I have suggested the Commission Presidents to add to their reports a brief section on scientific priorities for future research in the field of their Commissions In order to save space I have suggested to Commission Presidents that references to published papers are given on the basis of their number in the published issues of Astronomy and Astrophysics Abstracts For instance the indication 06 078 019 or AAA 06 078 **The Encyclopædia Britannica** Hugh Chisholm,1922

Asteroid Impact Risk Josep M. Trigo-Rodríguez,2022-03-08 This book describes the complexity of impact hazards associated with asteroids and comets The challenge in this regard lies in the heterogeneous nature of these bodies that endanger our planet which is why we are conducting new experiments to better understand their unique physicochemical properties Several generations of astronomers have tracked and mapped the orbits of asteroids and comets over the past few centuries and telescopic surveys have only begun to discover new interstellar objects In addition cutting edge software allow

our computers to combine the orbits of these elusive bodies to study how they evolve over time and seek to match asteroid complexes as fragments of asteroidal and cometary disruptions Impact hazards represent one of the greatest threats to the survival of human beings in the medium term Geological studies show that the stratigraphic record holds clear geological evidence of these rare but transcendental encounters in the history of life on our planet The study and quantification of past catastrophes can give us clues to face future challenges in the form of potential impacts Further it would be illogical to assume that Earth s interaction with space is limited to major impacts Every night Earth is struck by millions of particles and dozens of meteor showers occur around the globe every year The study of lake and ocean sediments reveals the magnitude of the continuous contribution of interplanetary matter reaching Earth roughly 100 000 tons per year Accordingly the goal of this book is to underscore the need for society wide awareness of the dangers associated with asteroid and comet impacts on the basis of scientific evidence and with no intention of sparking alarmism After all we ourselves may only be the fruit of an opportunity given to mammals sixty five million years ago to evolve after the conflagration that would be the downfall of the dinosaurs If we have learned to read Earth s geological history we should consider ourselves a very fortunate species and its teachings should equip us to face this problem The also book emphasizes the role of space missions to gain insights on these bodies particularly describing the relevance of the DART NASA and Hera ESA missions to deflect and study Dimorphos respectively the small satellite of the Didymos binary asteroid **The Scientific Monthly** James McKeen Cattell,1923
