Theory Of Conceptual Intelligence Thinking Learning Creativity And Giftedness:

A Theory of Conceptual Intelligence Rex Li, 1996-04-30 Li briefly outlines three generations of intelligence research over the past 100 years with attention to the origins and limitations of early investigations and the resulting confusion and disagreement in modern reinterpretations of the findings He discerns an emerging consensus among scholars and researchers that intelligence should be considered primarily as a product of thinking and learning To find the essence of how thinking is possible and what learning is Li investigates theory and research in cognitive psychology developmental linguistics animal behavior and many other related disciplines He proposes the notion of conceptual intelligence i e human intelligence as a result of thinking and learning through concepts Li traces how the human species created concepts and how conceptual thinking and conceptual learning make the human species intelligent and creative There is nothing mysterious intuitive or innate about it Our past thinking and learning has created the intelligence of today and will continue to create our intelligence in the future How to think deeper and learn better are the difficult questions for us now as we consciously venture into new arenas of problem solving and cognition

Rediscovering John Dewey Rex Li, 2020-11-02 This book tries to trace Dewey s intellectual history from his early years to the end focusing on the themes of psychology and the psychological aspect of education in Dewey s lifelong writing The author mixed the discussion on Dewey s work with his life stories and shows readers how his ideas evolved over time In turn the book offers a critical review of his ideas in the areas of psychology and education Lastly it assesses Dewey s involvement in and impact on education In short it provides a comprehensive account of his legacy in psychology and education

Intelligence Reframed Howard E Gardner, 2000-09-18 Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey His ideas about intelligence and creativity explicated in such bestselling books as *Frames of Mind* and *Multiple Intelligences* over 200 000 copies in print combined have revolutionized our thinking In his groundbreaking 1983 book *Frames of Mind* Howard Gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world Now in *Intelligence Reframed* Gardner provides a much needed report on the theory its evolution and revisions He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him He also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value Ultimately argues Gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species Gardner also offers provocative ideas about creativity leadership and moral excellence and speculates about the relationship between multiple intelligences and the world of work in the future
