to his work on logic and geometry including his two short pamphlets on architecture Drawing on selected key moments in our philosophical tradition including phenomenology and sociospatial theories Caroline Dionne interrogates the relationship between words and spaces highlighting the crucial role of language in processes of placemaking Through an interdisciplinary method that relates literary and language theories to theories of space and placemaking with emphasis on the social and political experience of architectural spaces Dionne investigates Carroll s most famous children s books Alice s Adventures in Wonderland and Through the Looking Glass and What Alice Found There in relation to his lesser known publications on geometry and architecture The book will be of interest to scholars working in design theory design history architecture and literary theory and criticism

**Constructing a Language** Michael Tomasello,2005-03-31 Tomasello presents a comprehensive usage based theory of language acquisition Drawing together a vast body of empirical research in cognitive science linguistics and developmental psychology Tomasello demonstrates children s linguistic ability is interwoven with other cognitive abilities

**Modern Theories of Language** Mortéza Mahmoudian,1993 In a controversial look at the study of linguistics today Mort za Mahmoudian examines twentieth century theories of language in light of empirical evidence In the past linguists have had to choose between a general linguistic theory aimed at universal explanatory power and specific limited linguistic models Arguing that at various levels of linguistic analysis different theories offer more or less explanatory power Mahmoudian makes a persuasive case for an integrated approach incorporating the strengths of both methods The author begins with the identification of principles which despite differences in terminology are held in common by most twentieth century linguists He shows the implications merits and shortcomings of the major schools of linguistic thought as well as the techniques one can use in gathering data Ranging over a wide variety of international linguistic thinking Mahmoudian takes up the question of what he calls experimentation or the extent to which the application of certain linguistic theories have validity in constucting models Simultaneously a survey of the current state of linguistic theory and a case for the necessity of empirical verification in linguistics Modern Theories of Language builds a bridge across the gulf between many long standing conflicts in the theory of language Accessibly written this provocative work predicts future theorical and epistemological developments and will prove essential reading for students and scholars of linguistics as well as specialists in cognitive psychology and Romance languages
