Theory Of Musical Semiotics:

A Theory of Musical Semiotics Eero Tarasti, 1994-12-22 Since Tarasti's is unquestionably the most fully developed narrative theory in the literature this book is an important landmark Music Letters Eero Tarasti advances a semiotic theory of music based on information provided by the history of Western music and by various sign theories A Theory of Musical Semiotics provides a model for the semiotic analysis of both musical structure and semantics It introduces English language readers to musical narratology which has been largely the province of European researchers

Signs of Music Eero Tarasti, 2012-05-15 Music is said to be the most autonomous and least representative of all the arts However it reflects in many ways the realities around it and influences its social and cultural environments Music is as much biology gender gesture something intertextual even transcendental Musical signs can be studied throughout their history as well as musical semiotics with its own background Composers from Chopin to Sibelius and authors from Nietzsche to Greimas and Barthes illustrate the avenues of this new discipline within semiotics and musicology

Musical Semiotics Revisited Eero Tarasti, Paul Forsell, Richard Littlefield, 2003

Playing with Signs V. Kofi Agawu, 2025-03-25 An award winning account of the importance of semiotic play in Classic instrumental music including that of Mozart Haydn and Beethoven Of all the repertoires of Western Art music none is as explicitly listener oriented as that of the late eighteenth and early nineteenth centuries Yet few attempts to analyze the so called Classic Style have embraced the semiotic implications of this fact In Playing with Signs Kofi Agawu proposes a listener oriented theory of Classic instrumental music that encompasses its two most fundamental communicative dimensions expression and structure Units of expression defined in reference to topoi are shown here to interact with confront and merge into units of structure defined in terms of the rhetorical conventions of beginning continuing and ending The book draws on examples from works by Mozart Haydn and Beethoven to show that the explicitly referential even theatrical surface of Classic music derives from a play with signs Although addressed primarily to readers interested in musical analysis the book opens fruitful avenues for further research into musical semiotics aesthetics and Classicism

Musical Semiotics in Growth Eero Tarasti, Paul Forsell, Richard Littlefield, 1996 The international research project on Musical Signification since its founding over ten years ago has sought to win new scholars to musical semiotics To that end the Department of Musicology at Helsinki University has already organized five international doctoral and postdoctoral seminars They have become something of a tradition The anthology consists of papers presented in the three first seminars covering areas from music philosophy and aesthetics to the analysis of vocal and instrumental as well as electro acoustic music interrelationships of arts music history post modernism etc

The Sense of Music Raymond Monelle, 2010-09-17 The fictional Dr Strabismus sets out to

write a new comprehensive theory of music But music's tendency to deconstruct itself combined with the complexities of postmodernism doom him to failure This is the parable that frames *The Sense of Music* a novel treatment of music theory that reinterprets the modern history of Western music in the terms of semiotics Based on the assumption that music cannot be described without reference to its meaning Raymond Monelle proposes that works of the Western classical tradition be analyzed in terms of temporality subjectivity and topic theory Critical of the abstract analysis of musical scores Monelle argues that the score does not reveal music's sense That sense what a piece of music says and signifies can be understood only with reference to history culture and the other arts Thus music is meaningful in that it signifies cultural temporalities and themes from the traditional manly heroism of the hunt to military power to postmodern polyvocality This theoretical innovation allows Monelle to describe how the Classical style of the eighteenth century which he reads as a balance of lyric and progressive time gave way to the Romantic need for emotional realism He argues that irony and ambiguity subsequently eroded the domination of personal emotion in Western music as well as literature killing the composer's subjectivity with that of the author This leaves Dr Strabismus suffering from the postmodern condition and Raymond Monelle with an exciting controversial new approach to understanding music and its history

A Theory of Musical Narrative Byron

Almén,2008-11-26 Byron Almén proposes an original synthesis of approaches to musical narrative from literary criticism semiotics historiography musicology and music theory resulting in a significant critical reorientation of the field This volume includes an extensive survey of traditional approaches to musical narrative illustrated by a wide variety of musical examples that highlight the range and applicability of the theoretical apparatus Almén provides a careful delineation of the essential elements and preconditions of musical narrative organization an eclectic analytical model applicable to a wide range of musical styles and repertoires a classification scheme of narrative types and subtypes reflecting conceptually distinct narrative strategies a wide array of interpretive categories and a sensitivity to the dependence of narrative interpretation on the cultural milieu of the work its various audiences and the analyst *A Theory of Musical Narrative* provides both an excellent introduction to an increasingly important conceptual domain and a complex reassessment of its possibilities and characteristics

On Musical Self-similarity Gabriel Pareyón,2011 **A Theory of Virtual Agency for Western Art**

Music Robert S. Hatten,2018-09-06 In his third volume on musical expressive meaning Robert S Hatten examines virtual agency in music from the perspectives of movement gesture embodiment tropes emotion narrativity and performance Distinguished from the actual agency of composers and performers whose intentional actions either create music as notated or manifest music as significant sound virtual agency is inferred from the implied actions of those sounds as they move and reveal tendencies within music stylistic contexts From our most basic attributions of sources for perceived energies in music to the highest realm of our engagement with musical subjectivity Hatten explains how virtual agents arose as distinct from actual ones how unspecified actants can take on characteristics of virtual human agents and how virtual agents assume

various actorial roles Along the way Hatten demonstrates some of the musical means by which composers and performers from different historical eras have staged and projected various levels of virtual agency engaging listeners imaginatively and interactively within the expressive realms of their virtual and fictional musical worlds The Crucifixion in Music Jasmin Melissa Cameron,2006 The Crucifixion in Music studies the musical representation of words and the concepts and contexts to which words refer examining the way the treatment of a literary text namely the Crucifixus coalesces into a recognizable musical tradition that individual composers follow develop modify or ignore *Music as Discourse* Kofi Agawu,2008-12-02 The question of whether music has meaning has been the subject of sustained debate ever since music became a subject of academic inquiry Is music a language Does it communicate specific ideas and emotions What does music mean and how does this meaning occur Kofi Agawu s *Music as Discourse* has become a standard and definitive work in musical semiotics Working at the nexus of musicology ethnomusicology and music philosophy and aesthetics Agawu presents a synthetic and innovative approach to musical meaning which argues deftly for the thinking of music as a discourse in itself composed not only of sequences of gestures phrases or progressions but rather also of the very philosophical and linguistic props that enable the analytical formulations made about music as an object of study The book provides extensive demonstration of the pertinence of a semiological approach to understanding the fully freighted language of romantic music stresses the importance of a generative approach to tonal understanding and provides further insight into the analogy between music and language *Music as Discourse* is an essential read for all who are interested in the theory analysis and semiotics of music of the romantic period **Semiotics and International Scholarship: Towards a Language of Theory** J.P. Evans,André Helbo,2012-12-06 Proceedings of the NATO Advanced Study Institute Estoril Portugal September 18 30 1983

Conceptualizing Music Lawrence M. Zbikowski,2002-11-14 This book shows how recent work in cognitive science especially that developed by cognitive linguists and cognitive psychologists can be used to explain how we understand music The book focuses on three cognitive processes categorization cross domain mapping and the use of conceptual models and explores the part these play in theories of musical organization The first part of the book provides a detailed overview of the relevant work in cognitive science framed around specific musical examples The second part brings this perspective to bear on a number of issues with which music scholarship has often been occupied including the emergence of musical syntax and its relationship to musical semiosis the problem of musical ontology the relationship between words and music in songs and conceptions of musical form and musical hierarchy The book will be of interest to music theorists musicologists and ethnomusicologists as well as those with a professional or avocational interest in the application of work in cognitive science to humanistic principles Playing with Signs Victor Kofi Agawu,1991 Of all the repertoires of Western Art music none is as explicitly listener oriented as that of the late eighteenth and early nineteenth centuries Yet few attempts to analyze the so called Classic Style have embraced the semiotic implications of this condition *Playing with Signs* proposes a listener oriented

theory of Classic instrumental music that encompasses its two most fundamental communicative dimensions expression and structure Units of expression defined in reference to topoi are shown here to interact with confront and merge into units of structure defined in terms of the rhetorical conventions of beginning continuing and ending The book draws on examples from works by Mozart Haydn and Beethoven to show that the explicitly referential even theatrical surface of Classic music derives from a play with signs Although addressed primarily to readers interested in musical analysis the book opens up fruitful avenues for further research into musical semiotics aesthetics and Classicism Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
