

Drive Reduction Theory

Drive Reduction Theory posits that motivation is driven by the need to satisfy physiological needs. When individuals experience imbalances or deficiencies, they are motivated to take actions to reduce these drives and achieve internal balance (homeostasis). Examples include hunger, thirst, and fatigue, which lead individuals to eat, drink, and rest, respectively. While the theory explains basic biological motivations, it may not fully account for complex human behaviors influenced by external factors and learned needs.

Theory Reduction Theory Change:

Theory Change, Ancient Axiomatics, and Galileo's Methodology Jaakko Hintikka, D. Gruender, E. Agazzi, 2012-12-06
Proceedings of the 1978 Pisa Italy September 4 8 1978 Conference on the History and Philosophy of Science **Theory
Reduction and Theory Change** Lawrence Sklar, *Philosophical Problems of Behavioural Economics* Stefan
Heidl, 2016-05-05 The goal of behavioural economics is to improve the explanatory and predictive power of economics This
can be achieved by using theoretical and methodological resources of psychology Its fundamental idea is that the relationship
between psychology and economics cannot be subsumed under standard philosophical accounts of intertheoretical relations
Philosophical Problems of Behavioural Economics argues that behavioural economics is best understood as an attempt to
deidealize economic theory guided by psychological research Behavioural economics deconstructs the model of decision
making by adding different elements Based on this understanding behavioural economics has a number of tasks first it has to
identify which economic theory needs to be challenged second it aims to identify factors which need to be modelled within
economic theories of choice and modify the theory accordingly and finally it has to create models that explain economic
phenomena based on the new theory This book analyses the different stages of this deconstruction process and shows how
the scientific disciplines of economics and psychology are connected by it This volume develops a new account of
intertheoretical relations based on the idea of deidealization and thus contributes to debates within the philosophy of social
science It is suitable for those who are interested in or study economic theory and philosophy economic psychology and
