There's Something About Mary Peter Ludlow, Yujin Nagasawa, Daniel Stoljar, 2004-11-19 In Frank Jackson's famous thought experiment Mary is confined to a black and white room and educated through black and white books and lectures on a black and white television In this way she learns everything there is to know about the physical world If physicalism the doctrine that everything is physical is true then Mary seems to know all there is to know What happens then when she emerges from her black and white room and sees the color red for the first time Jackson's knowledge argument says that Mary comes to know a new fact about color and that therefore physicalism is false The knowledge argument remains one of the most controversial and important arguments in contemporary philosophy There's Something About Mary the first book devoted solely to the argument collects the main essays in which Jackson presents and later rejects his argument along with key responses by other philosophers These responses are organized around a series of questions Does Mary learn anything new Does she gain only know how the ability hypothesis or merely get acquainted with something she knew previously the acquaintance hypothesis Does she learn a genuinely new fact or an old fact in disguise And finally does she really know all the physical

facts before her release or is this a misdescription The arguments presented in this comprehensive collection have important implications for the philosophy of mind and the study of consciousness
