## Thermal Conductivity 15:

**Thermal Conductivity 15** V. V. Mirkovich, 2012-12-06 Once again it gives me a great pleasure to pen the Foreword to the Proceedings of the 15th International Conference on Thermal Conductivity As in the past these now biannual conferences provide a broadly based forum for those researchers actively working on this important property of matter to convene on a regular basis to exchange their experiences and report their findings As it is apparent from the Table of Contents the 15th Conference represents perhaps the broadest coverage of subject areas to date This is indicative of the times as the boundaries between disciplines become increasingly diffused I am sure the time has come when Conference Chairmen in coming years will be soliciting contributions not only in the physical sciences and engineering but will actively seek contributions from the earth sciences and life sciences as well Indeed the thermal conductivity and related properties of geological and biological materials are becoming of increasing importance to our way of life As it can be seen from the summary table unfortunately proceedings have been published only for six of the fifteen conferences It is hoped that hereafter this Series will become increasingly well known and be recognized as a major vehicle for the reporting of research on thermal conductivity

Thermal Conductivity 27 Hsin Wang, 2005 In addition to traditional topics such as thermal insulation instrumentation and standards the conference highlighted research in carbon nanotubes nanomaterials novel thin films thermoelectric and composites
