Tight Practical Integration Of Relations And Functions:

A Tight, Practical Integration of Relations and Functions Harold Boley, 1999-09-29 As in other fields in computer science certain objects of study can be synthesized from different basic elements in different ways and with different resulting stabilities In subfields such as artificial intelligence computational logic and programming languages various relational and functional ingredients and techniques have been tried for the synthesis of declarative programs This text considers the notions of relations as found in logic programming or in relational databases and of functions as found in functional programming or in equational languages We study a declarative integration which is tight because it takes place right at the level of these notions and which is still practical because it preserves the advantages of the widely used relational and functional languages PROLOG and LISP The resulting relational and functional language RELFUN is used here for exemplifying all integration principles

Partial Evaluation: Practice and Theory John Hatcliff, Torben Mogensen, Peter Thiemann, 2007-07-16 As the complexity of software increases researchers and practitioners continue to seek better techniques for engineering the construction of evolution of software Partial evaluation is an attractive technology for modern software construction since it provides automatic tools for software specialization and is based on rigorous semantic foundations This book is based on a school held at DIKU Copenhagen Denmark in summer 1998 during which leading researchers summarized the state of the art in partial evaluation The lectures presented survey the foundations of partial evaluation in a clear and rigorous manner and practically introduce several existing partial evaluators with numerous examples The second part of the book is devoted to more sophisticated theoretical aspects advances systems and applications and highlights open problems and challenges The book is ideally suited for advanced courses and for self study
