McGillivray, 2011-01-01 Why is British Columbia unique within Canada What forces have made its landscape so rugged its population so diverse How have its resources been exploited and managed in the past and in the present Brett McGillivray adopts mainly a thematic rather than a regional approach to answer these questions Beginning with a regional overview and introduction to geographic concepts he then moves to discuss the physical processes that produced a spectacular variety of mountains lakes fjords forests and minerals His thematic exploration traces the province's historical geography including First Nations lifeways colonization Asian immigration and institutionalized racism Detailed accounts of BC's economic geography forestry fisheries mining energy supply and demand agriculture water and tourism culminate in a discussion of contemporary issues such as urbanization economic development and resource management This fully revised edition is enhanced by updated figures maps and graphs and by new discussions including how globalization climate change and recession are influencing the province and its people      Travel guide, 1990      Travels in British Columbia Charles Edward Barrett-Lennard, 1862      *Resident Travel in British Columbia* British Columbia. Lumsdon,2010-09-23 It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change It is therefore vital that ways to reduce these impacts are developed and implemented Slow travel provides such a concept drawing on ideas from the slow food movement with a concern for locality ecology and quality of life The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable development It also aims to provide insights into the travel experience these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world In order to do this the book explores the concept of slow travel and sets out its core ingredients comparing it with related frameworks such as low carbon tourism and sustainable tourism development The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport which generally take much longer and become incorporated as part of the holiday experience The book critically examines the key trends in tourism transport and recent climate change debates setting out the main issues facing tourism planners It reviews the potential for new consumption patterns as well as current business models that facilitate hyper mobility This provides a cutting edge critique of the upstream drivers to unsustainable tourism Finally the authors illustrate their approach through a series of case studies from around the world featuring travel by train bus cycling and walking Examples are drawn from Europe Asia Australia and the Americas Cases include the Eurostar train as an alternative to air travel walking in the Appalachian Trail US the Euro Velo network of long distance cycling routes canoe tours on the Gudena River in Denmark sea kayaking in British Columbia
