*Trends in Private Investment in Developing Countries, 1990-91 Edition* Guy Pierre Pfeffermann, Andrea Madarassy, 1991

Trends in Private Investment in Developing Countries : 1990-91 Edition Robert R. Miller, 1995 **Historical Dictionary of the World Bank** Sarah Tenney, Anne C. Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies **Time to Rethink Privatization in Transition Economies?** John R. Nellis, 1999-01-01 IFC

Discussion Paper No 38 QUOTEIt is now universally acknowledged that ownership matters that private ownership in and of itself is a major determinant of good performance in firms Decent economic policy and well functioning legal and administrative institutions matter greatly as well QUOTE This paper looks at what happens when the shift to private ownership gets far out in front of the effort to build the institutional underpinnings of a capitalist economy The emphasis is on what went wrong and why and what if anything can be done to be correct it Proposals include renationalization and or postponement of further privatization both to be accompanied by measures to strengthen the managerial capacities of the state Neither approach seems likely to produce short term improvements The regrettable fact is that governments that botch privatization are equally likely to botch the management of state owned firms In a number of Central European transition countries privatization is living up to expectations and there is no need for such measures For institutionally weak countries the less dramatic but reasonable short term course of action is to push ahead more slowly with case by case and tender privatization in cooperation with the international assistance community in hopes of producing some success stories that will lead by example Corporations' Use of the Internet in Developing Countries John A. Daly, Robert R. Miller, 1998-01-01 This

study uses a survey technique to explore corporate Internet use in developing countries The survey includes both manufacturing and financial companies and provides an interesting picture of how firms in the developing world are beginning to utilize this new technology in ways broadly similar to companies in more industrialized countries

*Leapfrogging?* Robert R. Miller, 2001-01-01 IT and the Internet have been seen as a way to enable developing countries to

leapfrog over the development path and increase their rate of growth This paper reviews the situation in India where the government has strongly encouraged the development of information technology Although the software sector has become a large and growing export industry there are still the general problems of poor infrastructure and low public investment alongside regulations and controls that can stifle growth These factors will limit any leapfrogging as economic growth depends on complementary and complicated interactions

*An Introduction to the Microstructure of Emerging Markets* Jack D. Glen,1994-01-01 IFC Discussion Paper No 24 Investors interest in emerging markets has grown significantly in recent years because of potential high returns and the benefits of diversification Despite this increased activity there remains little information on

*Trends in Private Investment in Developing Countries* Guy P. Pfeffermann, **Primary Securities Markets** Anthony H. Aylward,Jack D. Glen,1999-01-01 IFC Discussion Paper No 39 During the period 1980-95 the level of activity increased dramatically for funds raised domestically via issues of debt and equity securities in public capital markets in 32 countries There were also substantial differences in the level of activity across markets and countries This paper examines aggregate domestic primary capital market activity in a cross section of countries including 24 emerging markets It defines exactly how important a role financial markets have played in raising capital for investment In this pioneering work the authors compile aggregate data on primary market activity for a recent period of time which allows them to quantify the size of the markets and how they have evolved over time Through their analysis the authors document the rapidly increasing importance of primary capital markets in many developing countries where relative to GDP these markets now source as much private capital as their developed country counterpart

*A Market-oriented Strategy for Small and Medium Scale Enterprises* Kristin Hallberg,2000-01-01 This paper investigates the economic rationale for intervention in support of small and medium scale enterprises on both theoretical and empirical grounds It argues that the justification for SME interventions lies in market and institutional failures that bias the size distribution of firms rather than on any inherent economic benefits provided by small firms The role of the state is mainly to provide an enabling business environment that opens access to markets and reduces policy induced biases against small firms Governments can accelerate the development of markets for financial and non financial services suited to SMEs by promoting innovation in products and delivery mechanisms and by building institutional capacity Improving the development impact of SME strategies will require much more attention to the monitoring and evaluation of intervention outcomes

**Firm Size and the Business Environment** Mirjam Schiffer,Beatrice Weder,2001-01-01 The development of the small and medium enterprise sector is deemed crucial for economic growth and poverty alleviation Such firms are often thought to be at a disadvantage when compared with larger enterprises but the reverse can apply for example in the more flexible approach of the smaller firm This paper draws on a private sector survey in 80 countries examining whether business obstacles are related to firm size It finds a bias against small firms which experience significantly greater problems than large firms with financing taxes and regulations inflation

corruption and street crime These problems should be the prime targets of policies aimed at reducing inequity **Debt Or Equity?** Jack D. Glen, Brian Pinto, 1994-01-01 IFC Discussion Paper No 22 Corporate finance in emerging market countries is changing dramatically as the recent liberalizations revitalize stagnant domestic capital markets and permit increased access to overseas markets With this trend evi International Joint Ventures in Developing Countries Robert R. Miller, 1996

Private Sector Electricity in Developing Countries Jack D. Glen, 1992 This discussion paper looks at the past and potential future role of the private sector in electricity generation in developing countries It considers the supply of electricity by the private sector as well as the role of private sector demand for electricity in total investment needs A case for private sector involvement in the sector is made to some extent based on evidence from the deregulation and privatization that has taken place in countries around the world The International Finance Corporation IFC historical and potential role in the sector is also examined *How Firms in Developing Countries Manage Risk* Jack D. Glen, 1993 The World Bank Research Observer, 1993 *World Bank Policy Research Bulletin* World Bank, 1991 **Foreign Investment and Technology**

**Transfer in Developing Countries** Ramesh Chandra Chitrakar, 1994 This is a study concerned with two important issues facing developing countries in general and Nepal in particular how to attract foreign investment and how to benefit from it It also compares foreign investment policy in Nepal with that in other developing countries and makes financial and economic analyses of foreign investment and technology transfer firms in Nepal **Index of Publications & Guide to Information Products and Services** World Bank, 1993 **Financing Corporate Growth in the Developing World**, 1991 This paper provides a review of recent economic developments and current economic prospects It presents a comparison of financing patterns in developed and developing countries identifying similarities and differences across firms Particular questions of interest are How do corporations in developing countries finance growth To what extent do these corporations resort to external finance Does loan finance dominate other types of external finance How different are financing patterns in developed and developing countries As a second objective the paper looks more closely at patterns within developing countries themselves The questions of interest are How similar are corporate capital structures in fast growing countries to those in more slowly growing countries What is the relationship between firm size and corporate financial patterns What is the relationship between corporate growth and corporate financing patterns Do companies which grow faster retain a greater proportion of their profits One issue of particular interest to IFC is whether capital structures and financial profiles of corporations supported by IFC in various developing countries are similar to those of other comparable companies
