Theoretical Framework and Scientific Basis introduces readers to all of the theoretical and scientific foundations of forensic anthropology beginning with how it was influenced by the early theoretical approaches of Tyler Morgan Spencer and Darwin. It instructs on how modern forensic science relies on an interdisciplinary approach with research being conducted in the fields of archaeology, physics, geology, and other disciplines. This modern approach to theory in forensic anthropology is presented through the introduction and discussion of Foundational, Interpretive, and Methodological theories. Sections cover Bias and Objectivity in Forensic Anthropology, Theory and Practice, The Theory and Science Behind Biological Profile and Personal Identification, Scientific Foundation for Interpretations of Antemortem, Perimortem, and Postmortem Processes, and Interdisciplinary Influences, Legal Ramifications, and Future Directions. Illustrates important aspects of the theory building process and reflects methods for strengthening the scientific framework of forensic anthropology as a discipline. Inspired by the Application of Theory to Forensic Anthropology symposium presented at the 67th annual meeting of the American Academy of Forensic Sciences.
