Knowledge Management Kai Mertins, Peter Heisig, Jens Vorbeck, 2013-03-19 By Leif Edvinsson Professor of Intellectual Capital University of Lund Lund Sweden In a marketplace characterized by the growing importance of intangibles and knowledge as we have not only in Europe today it has become more and more evident how important knowledge management and Intellectual Capital management has become Some of us who started this knowledge exploration journeys some decades ago could perhaps realize how quickly this theme should become so important Today it is on almost every executive s agenda The timing the context and the comprehensive content of this second edition could not have been better In this second edition the authors have extended their overview with case studies and facts that confirm what we intuitively knew Knowledge and intangibles are a top strategic issue It is vital for an organization if it wants to be competitive sustainable and profitable The solid overview and the holistic review and testing of the theories with real cases gives the reader a lot of facts and models of how management could invest in this area with very good return in one case with a return of investment of 200 % in one year It is a very extensive work on the growing field of knowledge management In its extension guidelines and emerging standards are already visible as e g the guide lines from the Danish government on IC reporting or of the Norwegian Association of Financial Analysts *Organizational Network Analysis* Anna Ujwary-Gil, 2019-12-11 The integrated meta model for organizational resource audit is a consistent and comprehensive instrument for auditing intangible

resources and their relations and associations from the network perspective This book undertakes a critically important problem of management sciences poorly recognized in literature although determining the current and future competitiveness of enterprises sectors and economies The author notes the need to introduce a theoretical input which is manifested by the meta model An expression of this treatment is the inclusion of the network as a structure of activities further knowledge as an activity and intangible assets as intellectual capital characterized by a structure of connections The case study presented is an illustration of the use of network analysis tools and other instruments to identify not only the most important resources tasks or actors as well as their effectiveness but also to connect the identified networks with each other The author opens the field for applying her methodology revealing the structural and dynamic features of the intangible resources of the organization The novelty of the proposed meta model shows the way to in depth applications of network analysis techniques in an intra organizational environment Organizational Network Analysis makes a significant contribution to the development of management sciences in terms of strategic management and more strictly resource approach to the company through structural definition of knowledge application of the concept of improvement oriented audit abandoning a narrow understanding of this technique in terms of compliance reliable presentation of audits available in the literature rigorous reasoning leading to the development of a meta model close linking of knowledge and resources with the strategy at the design stage of the developed audit model including the analysis of link dynamics and networks together with an extensive metrics proposal an interesting illustration of the application with the use of metrics tables and charts It will be of value to researchers academics managers and students in the fields of strategic management organizational studies social network analysis in management knowledge management and auditing knowledge resources in organizations
