Murderland Caroline Fraser, 2015-06-10 An Edgar Award finalist for True Crime A National Bestseller A Washington Post Notable Book Named a Best Book of the Year by The New Yorker Forbes NPR Vulture Chicago Tribune The Los Angeles Times Slate Newsweek New York Post LitHub Kirkus Reviews and The Nerve A finalist for the 2016 Andrew Carnegie Medal for Excellence in Nonfiction Scorching seductive A superb and disturbing vivisection of our darkest urges Los Angeles Times This is about as highbrow as true crime gets Vulture Fraser has outdone herself and just about everyone else in the true crime genre with Murderland Esquire From the Pulitzer Prize winning author of Prairie Fires comes a terrifying true crime history of serial killers in the Pacific Northwest and beyond a gripping investigation of how a new strain of psychopath emerged out of a toxic landscape of deadly industrial violence Caroline Fraser grew up in the shadow of Ted Bundy the most notorious serial murderer of women in American history surrounded by his hunting grounds and mountain body dumps in the brooding landscape of the Pacific Northwest But in the 1970s and 80s Bundy was just one perpetrator amid an uncanny explosion of serial rape and murder across the region Why so many Why so weirdly and nightmarishly gruesome Why the senseless rise and then sudden fall of an epidemic of serial killing As Murderland indelibly maps the lives and careers of Bundy and his infamous peers in mayhem the Green River Killer the I 5 Killer the Night Stalker the Hillside Strangler even Charles Manson Fraser's Northwestern death trip begins to uncover a deeper mystery and an overlapping pattern of environmental destruction At ground zero in Ted Bundy's Tacoma stood one of the most poisonous lead copper and arsenic smelters in the world but it was hardly unique in the West As Fraser's investigation inexorably proceeds evidence mounts that the plumes of these smelters not only sickened and blighted millions of lives but also warped young minds including some who grew up to become serial killers A propulsive nonfiction thriller Murderland transcends true crime voyeurism and noir mythology taking readers on a profound quest into the dark heart of the real American berserk Every Woman's Nightmare Steven Long, 2007-04-01 Well liked and respected Mark Hacking came from a highly successful Mormon family His father was a pediatrician One of his brothers was also a doctor and his other brother was an electrical engineer With acceptances into both George Washington University and University of North Carolina medical schools Mark was on the road to continuing his family's legacy of achievement And with a beautiful wife by his side Mark seemed to have it all But what he had was a tangled web of lies For eight years Mark lived a double life of deceptions petty crimes and failures duping everyone including his trusting wife Lori But when Lori uncovered his most extraordinary lie Mark Hacking turned from deceiver to stone cold killer On a hot July day in Utah Mark Hacking told police that his wife had disappeared while jogging For fourteen days searchers looked frantically for Lori The people who knew Mark Hacking and his wife best watched in amazement as suspicion fell on the outwardly normal doting young husband who everyone thought was on his way to medical school When Lori Hacking's badly decomposed body was found in a Salt Lake City landfill investigators and even family

members finally discovered the shocking truth Mark Hacking was not the man he seemed to be Every Woman s Nightmare is the shocking true crime story of a fairytale marriage that ended in murder **Serial Murderers and Their Victims** Eric W. Hickey,2006 The author examines the lives of over 400 serial murderers analyzing the cultural historical and religious factors that influence our myths and stereotypes of these individuals He then describes the biological psychological and sociological reasons for serial murder offering his own Trauma Control model for explaining serial murder behaviour This new edition includes new case profiles of Canada s two most prolific serial killers Robert Willy Picton and Clifford Olsen

Tiny You Jennifer L. Holland,2020-04-07 Caroline Bancroft History Prize 2021 Denver Public Library Armitage Jameson Prize 2021 Coalition of Western Women s History David J Weber Prize 2021 Western History Association W Turrentine Jackson Prize 2021 Western History Association Tiny You tells the story of one of the most successful political movements of the twentieth century the grassroots campaign against legalized abortion While Americans have rapidly changed their minds about sex education pornography arts funding gay teachers and ultimately gay marriage opposition to legalized abortion has only grown As other socially conservative movements have lost young activists the pro life movement has successfully recruited more young people to its cause Jennifer L Holland explores why abortion dominates conservative politics like no other cultural issue Looking at anti abortion movements in four western states since the 1960s turning to the fetal pins passed around church services the graphic images exchanged between friends and the fetus dolls given to children in school she argues that activists made fetal life feel personal to many Americans Pro life activists persuaded people to see themselves in the pins images and dolls they held in their hands and made the fight against abortion the primary bread and butter issue for social conservatives Holland ultimately demonstrates that the success of the pro life movement lies in the borrowed logic and emotional power of leftist activism *Clay, Robinson & Company's Live Stock Report ,1912* *Rodent Societies* Jerry O. Wolff,Paul W. Sherman,2008-09-15 *Rodent Societies* synthesizes and integrates the current state of knowledge about the social behavior of rodents providing ecological and evolutionary contexts for understanding their societies and highlighting emerging conservation and management strategies to preserve them It begins with a summary of the evolution phylogeny and biogeography of social and nonsocial rodents providing a historical basis for comparative analyses Subsequent sections focus on group living rodents and characterize their reproductive behaviors life histories and population ecology genetics neuroendocrine mechanisms behavioral development cognitive processes communication mechanisms cooperative and uncooperative behaviors antipredator strategies comparative socioecology diseases and conservation Using the highly diverse and well studied Rodentia as model systems to integrate a variety of research approaches and evolutionary theory into a unifying framework *Rodent Societies* will appeal to a wide range of disciplines both as a compendium of current research and as a stimulus for future collaborative and interdisciplinary investigations
