Power Failure Diana Dillaway, 2009-12-04 At the turn of the 20th century Buffalo NY was one of the world's great industrial cities In 1901 it played host to the prestigious Pan American Exhibition which attracted millions of visitors to the city its thriving downtown area was graced by buildings and mansions designed by some of the country's best architects the city was the third largest producer of steel and with the largest inland port was a hub of commerce at the end of the Erie Canal Today due to financial distress and decades of mismanagement the city has been put under the supervision of a financial control board Population drain and an inability to attract new business have brought the city to the brink of financial collapse The question on everyone's lips is What went wrong Community development expert and Buffalo native Diana Dillaway analyzes the history of planning and decision making in Buffalo that led to the current malaise A member of the Wendt family whose great grandfather founded one of Buffalo's oldest manufacturing businesses Dillaway has used her access to the city's most powerful political economic and community leaders to reconstruct the factors that created the city as it exists today She examines the most divisive debates of the past including strategies for downtown and neighborhood development planning for a rapid transit system and battles over the location of a proposed university campus and a professional football stadium A consistent theme is the protection of the status quo and turf battles among the WASP business and financial elite ethnic Catholic communities centered on neighborhood parish life and the Democratic machine with its entrenched patronage system She finds that the only people interested in change were African Americans whose efforts were consistently thwarted by a multi term mayor who diverted community development funds for his own pet projects At a time when Buffalo is trying to build a brighter future Dillaway's insights revelations and prescriptions for change comprise urgent reading for community leaders and citizens alike

Power Failure speaks to issues of leadership and power facing every city and local government today
