## **We Were Only Human:**

*You're Only Human* Kelly M. Kapic, 2022-01-18 Work Family Church Exercise Sleep The list of demands on your time seems to be never ending It can leave you feeling a little guilty like you should always be doing one more thing Rather than sharing better time management tips to squeeze more hours out of the day Kelly Kapic takes a different approach In the paperback edition of *You're Only Human* he offers a better way to make peace with the fact that God didn't create us to do it all by exploring the theology behind seeing our human limitations as a gift rather than a deficiency laying out a path to holistic living with life giving relationships and meaningful contributions to the world freeing us from confusing our limitations with sin and inviting us to rest in the joy and relief of knowing that God can use our limitations to foster freedom joy growth and community Readers will emerge better equipped to cultivate a life that fosters gratitude rest and faithful service to God

**It's Only Human** Armin W. Schulz, 2025 What makes humans cognitively unique and why are we unique in these ways Armin W Schulz suggests that the singularity of our ways of thinking is based in a positive feedback loop that joins innate representations forms of cultural learning and technology This feedback loop explains a number of key applications of our cognitive abilities from our industriousness through trade our conceptions of morality and our ability to engage with the thoughts of others Discussing the evolution of human cognition is complicated by the fact that it must be recognized to be multi dimensional culturally variable and only differing in degree from non human cognition Taking this complexity into account Schulz develops an interactionist theory of the evolution and nature of distinctively human cognition At the core of this theory is the idea that underlying human cognitive uniqueness is a complex interlocking interplay between three different elements 1 a set of evolved representational expectations 2 a pronounced disposition for cultural learning and 3 complex and variegated technology All three are further underwritten by a unique set of lower level cognitive abilities which are in turn influenced by the feedback loop created by the major three With the help of this feedback loop key examples of uniquely human cognition can be explained distinctively human mindreading distinctively human moral cognition and the distinctively human propensity for trade Schulz concludes with an application of this interactionist theory of distinctively human cognition to some issues of contemporary importance the relationship between distinctively human cognition and increasingly sophisticated artificial intelligence the role of religion in human thought and action and the relationship between extensive patent regimes and human innovation It's Only Human makes clear how human cognition can end up differing quite markedly from non human cognition even though its individual elements might initially and intrinsically only differ in relatively small degrees *The Beekeeper*, 1921 [Sesame and Lilies: Two Lectures](#) John Ruskin, 1891 **Charles Kingsley** Charles Kingsley, 1878 **Stone Cutters' Journal**, 1914 *RIBA Journal* Royal Institute of British Architects, 1901 *Chambers's Encyclopaedia*, 1883 *Harper's New Monthly Magazine*, 1888
