institutions are important and how to build them Mitchell Wigdor expertly addresses fundamental shortcomings in the existing development literature by identifying specific institutions that mediate the relationship between Information and Communications Technology ICT and economic growth In doing so he challenges those concerned with development to shift their gaze from whether institutions are important to economic development to which institutions might be the focus of government efforts and how to build them Detailed case studies of the economic development strategies of Singapore and Malaysia from 1960 demonstrate that institution building and economic development may be as much about process as the specific policies governments pursue Written in accessible non technical language this book should be read by everyone concerned with economic growth both in less economically developed countries and the more prosperous including those in government international organizations NGOs universities policy makers and the private sector *Rich People Poor Countries* Caroline Freund ,2016-02-11 Like the robber barons of the 19th century Gilded Age a new and proliferating crop of billionaires is driving rapid development and industrialization in poor countries The accelerated industrial growth spurs economic prosperity for some but it also widens the gap between the super rich and the rest of the population especially the very poor In *Rich People Poor Countries* Caroline Freund identifies and analyzes nearly 700 emerging market billionaires whose net worth adds up to more than 2 trillion Freund finds that these titans of industry are propelling poor countries out of their small scale production and agricultural past and into a future of multinational industry and service based mega firms And more often than not the new billionaires are using their newfound acumen to navigate the globalized economy without necessarily relying on political connections inheritance or privileged access to resources This story of emerging market billionaires and the global businesses they create dramatically illuminates the process of industrialization in the modern world economy *Defeating Political Islam* Moorthy S.
