## **Weapons Of Mass Destruction Prospects For Proliferation:**

**Weapons of Mass Destruction** E. Spiers,2000-02-24 The proliferation of weapons of mass destruction has continued to give cause for concern even after the end of the Cold War This book analyses how the prospects for proliferation have changed since the 1990s particularly in light of the Gulf War and the UN inspections of Iraq It will examine the new pattern of incentives and disincentives for proliferation the utility of these weapons at state and sub state levels and their implications for arms control and international security Weapons of Mass Destruction , Terrorism and Weapons of Mass Destruction Ian Bellany,2007-12-12 There is a widely held belief in the imminent probability of nuclear chemical or biological weapons of mass destruction being used by terrorists against civilian targets This edited volume critically assesses the suggestion that one safeguard against this possibility would be to strengthen existing international prohibitions against state level acquisition of such weapons A glimpse of the possible potential of terrorist use of weapons of mass destruction has been seen through the actions of the Tokyo Aum group and through the use of chlorine by insurgents in Iraq However the extent of the real threat posed is as yet unclear and safeguarding against it in developing countries will not be easy This book assembles specialists in each category of WMD in order to examine the potential of expanding the three classical arms control treaties in order to combat the threat posed by smaller terrorist groups and draws conclusions as to the strengths and weaknesses of this suggestion **Directed Energy Weapons on the Battlefield** John P. Geis,2003 Several nations are engaging in development and production of directed energy weapons Recent scientific advances now enable the production of lethal lasers and high powered microwaves The current growth and development in this emerging area strongly suggests that directed energy weapons of lethal power will reach the battlefield before 2010 Since proliferation of lower power laser weapons has already happened it is likely that proliferation of high power or high energy weapons will occur as well This paper expands on this development and posits potential impacts on a plausible future battlefield developed in part from the Alternate Futures of AF 2025 where all comers deploy lethal directed energy technologies From these impacts which span doctrine organization force structure and systems design this paper recommends changes to better posture the United States for this potential future Countering the Proliferation of Weapons of Mass Destruction Thanos P Dokos,2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have

been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Doxos presents an assessment of the Alliance's options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers *Agents of War* Edward M. Spiers, 2020-11-05 Often described as the misuse of science chemical and biological weapons have incurred widespread opposition over the years Despite condemnation from the United Nations governments and the disarmament lobby they remain very real options for rogue states and terrorists In this new edition of *Agents of War* Edward M Spiers has expanded and updated this much needed history with two new chapters on political poisoning and chemical weapons in the Middle East Spiers breaks new ground by presenting his analysis in both historical and contemporary contexts giving a comprehensive chronological account of why where and when such weapons were used or suspected to be deployed *The Law of Armed Conflict and the Use of Force* Frauke Lachenmann, Rüdiger Wolfrum, 2016-12-15 This volume brings together articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law the definitive reference work on international law It provides an invaluable resources for scholars students and practitioners of international humanitarian law giving an accessible thorough overview of all aspects of the field Each article contains cross references to related articles and includes a carefully selected bibliography of the most important writings and primary materials as a guide to further reading The Encyclopedia can be used by a wide range of readers Experienced scholars and practitioners will find a wealth of information on areas that they do not already know well as well as in depth treatments on every aspect of their specialist topics Articles can also be set as readings for students on taught courses **Eliminating Weapons of Mass Destruction** J. Mathiason, B. Andemicael, 2005-04-04 The events of September 11 2001 have altered the course of arms control intended to eliminate weapons of mass destruction WMD and has made the role of international organizations controversial Whether they can effectively verify compliance with the WMD treaty regime has now been questioned by the United States In responding to this basic question *Eliminating Weapons of Mass Destruction* examines how existing organizations apply the main verification tools how they can improve and consolidate them where possible in order to meet the new security challenges more effectively **Proliferation of Weapons of Mass Destruction** United States. Congress. Office of Technology Assessment, 1993 **WMD Arms Control in the Middle East** Harald Müller, 2016-02-17 The Middle East is a hot spot of proliferation It contains one state assumed to possess nuclear weapons several states that tried and failed to develop a military nuclear capability one state under suspicion of trying to do so and it is the world region that witnessed the most frequent and severe employment of chemical weapons since the end of World

War I Notwithstanding not a single arms control regime concerning weapons of mass destruction WMD covers the region as a whole Instead we have seen several proliferation related military operations which have rather contributed to destabilization than served non proliferation This volume written under the auspices of the EU Consortium for Non Proliferation and Disarmament determines the current state of diplomatic efforts to establish a WMD free zone in the Middle East In doing so it provides insights into central actors conflicting political positions thereby explaining the stalemate of efforts to negotiate a WMD free zone Chapters written by renowned experts from academia and policy oriented think tanks as well as by next generation Middle East and arms control experts introduce the subject to the reader give background information about arms control initiatives provide technical expertise and endeavour to make proposals for arms control measures in support of the creation of a Middle East WMD free zone Weapons of Mass Destruction Stuart E. Johnson,William H. Lewis,1995 **Journal of Peace Studies** ,2005 **Proliferation of weapons of mass destruction : assessing the risks.** ,1993 Since the end of the Cold War the proliferation of weapons of mass destruction has become much more prominent in U S national security and foreign policy planning Revelations about Iraqi North Korean South African and Israeli nuclear weapon programs the possibility of a nuclear arms race in South Asia and the multidimensional conflicts in the Middle East all point to the immediacy of this problem Adding a dangerous new twist is the dissolution of the Soviet Union a superpower armed with nuclear chemical and biological weapons whose successor states are wracked by economic crises and political instability At least three main factors underlie this renewed emphasis on proliferation First the reduced military threat from the former Soviet Union has increased the relative importance of lesser powers especially if armed with weapons of mass destruction Second certain international political and technological trends are increasing the threat to international security from proliferation Third new opportunities are opening for enhancing the current international regimes designed to stem proliferation Since at least as far back as the 1960s when it sponsored the Non Proliferation Treaty NPT the United States has recognized that proliferation is a global problem and combating it requires high levels of international cooperation This country has also exerted unilateral influence successfully in several cases to discourage proliferation it will no doubt continue to do so Nevertheless placing priority on nonproliferation will require the further development and enforcement of international norms and behavior supporting that objective International conditions today offer significant opportunities for such cooperation **Nuclear Weapons, Arms Control, and the Threat of Weapons of Mass Destruction** Robert Lester,2002 *Daily Report* ,1991 **Weapons of Mass Destruction [2 volumes]** Eric A. Croddy,James J. Wirtz,Jeffrey A.
