Weaving Of Mantra:

The Weaving of Mantra Ryūichi Abé, 1999-06-28 The great Buddhist priest Kukai 774-835 is credited with the introduction and establishment of tantric or esoteric Buddhism in early ninth century Japan. In *The Weaving of Mantra*, Ryūichi Abé examines this important religious figure neglected in modern academic literature. [The Weaving of Mantra](#) Ryūichi Abe, 1999. *The Weaving of Mantra* embeds Kūkai within the fabric of political and social life in ninth century Japan and explains how esoteric Buddhism played a critical role in many societal changes in Japan from the growth of monasteries into major feudal powers to the formation of the native phonetic alphabet kana. As Abe illustrates Kūkai's writings and the new type of discourse they spawned also marked Japan's transition from the ancient order to the medieval world replacing Confucianism as the ideology of the state. **BOOK JACKET**

Esoteric Buddhism and Texts Jinhua Chen, 2024-02-08 This book explores trans-cultural and cross-border transformation of Esoteric Buddhism in East Asia focusing on the significance of Esoteric Buddhism in relation to some forms of material culture including rituals, arts, and the construction of sacred space and narratives. In East Asia, Esoteric Buddhism's influences can be seen across all levels of society not only in that it achieved a recognizable sectarian identity but also because elements of esoteric teachings were absorbed by other religious schools influencing their philosophical tenets and everyday practices. The influence was not confined to the religious sphere; scholars have been paying more and more attention to the significance of Tang Esoteric Buddhism in relation to material culture and the dissemination of Esoteric Buddhist technologies in South Central and East Asia. No matter how one looks at a mala, an integral feature of esoteric practice, or the uncannily expressive statues of Buddhas, Bodhisattvas, or Yidams that come in all shapes and sizes, or the murals that depict the variegated mysterious themes of the esoteric tradition, one can always recognize the profound connection between art and Esoteric Buddhism. Esoteric influences also abound in East Asian literature across different genres displaying its unique characters both in poetry and prose. Likewise in architecture, one can readily make out the enigmatic, colorful, and distinctive elements characteristic of the esoteric tradition. Monks initiated into the esoteric lineages not only brought Buddhist classics and practices to China but also advanced knowledge in astronomy, calendrical calculations, and mathematical theories. The chapters in this volume investigate the profound and far-reaching impacts wrought by Esoteric Buddhism on rituals, arts, and the construction of sacred space and narratives in East Asia. This book will be beneficial to advanced students and researchers interested in Religious Studies, History, and Buddhist Studies. It was originally published as a special issue of *Studies in Chinese Religions*.

Strange Names of God Sangkeun Kim, 2004 One of the most precarious and daunting tasks for sixteenth-century European missionaries in the cross-cultural mission frontiers was translating the name of God, Deus, into the local language. When the Italian Jesuit Matteo Ricci (1552-1610) introduced the Chinese term Shangti as the semantic equivalent of Deus, he made one of the most innovative cross-cultural missionary translations. Ricci's employment of Shangti was neither a simple rewording of a Chinese term nor the use of a loan word but

was indeed a risk taking identification of the Christian God with the Confucian Most High Shangti Strange Names of God investigates the historical progress of the semantic configuration of Shangti as the divine name of the Christian God in China by focusing on Chinese intellectuals reaction to the strangely translated Chinese name of God *Word Embodied* Halle O'Neal,2020-10-26 In this study of the Japanese jeweled pagoda mandalas Halle O Neal reveals the entangled realms of sacred body beauty and salvation Much of the previous scholarship on these paintings concentrates on formal analysis and iconographic study of their narrative vignettes This has marginalized the intriguing interplay of text and image at their heart precluding a holistic understanding of the mandalas and diluting their full import in Buddhist visual culture *Word Embodied* offers an alternative methodology developing interdisciplinary insights into the social religious and artistic implications of this provocative entwining of word and image O Neal unpacks the paintings revolutionary use of text as picture to show how this visual conflation mirrors important conceptual indivisibilities in medieval Japan The textual pagoda projects the complex constellation of relics reliquaries scripture and body in religious doctrine practice and art *Word Embodied* also expands our thinking about the demands of viewing recasting the audience as active producers of meaning and offering a novel perspective on disciplinary discussions of word and image that often presuppose an ontological divide between them This examination of the jeweled pagoda mandalas therefore recovers crucial dynamics underlying Japanese Buddhist art including invisibility performative viewing and the spectacular visualizations of embodiment **Facing Images** Kristopher W. Kersey,2024-08-06 If we want to decolonize the history of art argues Kristopher Kersey we must rethink our approach to the historical record This means dispensing with Eurocentric binaries divisions between Western and non Western modern and premodern and making a commitment to artworks that challenge the perspectives we build upon them In *Facing Images* the question takes elegant and intriguing form If the aesthetic hallmarks of modernity can be found in twelfth century art what does it really mean to be modern Kersey s answer to this question models a new historiography *Facing Images* begins by tracing the turbulent discourse surrounding the emergence of Japanese art history as a modern field In lieu of examining canonical works from the twelfth century Kersey foregrounds the elusive and the enigmatic in artworks little known and understudied outside Japan the manuscripts he selects defy traditional art historical narratives by exhibiting decidedly modern techniques including montage self reference reuse noise dissonance and chronological disarray Kersey weaves these medieval case studies together with insights from a wide range of interdisciplinary scholarship using a methodology that will prove important for historians *Facing Images* produces a history of non Western art in which diverse and anachronic works are brought responsibly and equitably into dialogue with the present without being subsumed under Eurocentric formalisms or false universals A timely intervention in the history of medieval Japanese art art historiography and the history of global modernism *Facing Images* redefines the relationship of the premodern non West to modern art It will be of particular interest to scholars of medieval Japanese art and of modernism **Esoteric Lessons for the First Class of the School of**
