Who Needs Irish:

Who Needs Irish? Ciarán Mac Murchaidh, 2004 *Minority Languages and Group Identity* John Edwards, 2010-01-01
The central concern in this book is the relationship between language and group identity a relationship that is thrown into greatest relief in minority settings Since much of the current interest in minority languages revolves around issues of identity politics language rights and the plight of endangered languages one aim of the book is to summarise and analyse these and other pivotal themes Furthermore since the uniqueness of every language contact situation does not rest upon unique elements or features but rather upon the particular weightings and combinations of features that recur across settings the second aim here is to provide a general descriptive framework within which a wide range of contact settings may be more easily understood The book thus begins with a discussion of such matters as language decline maintenance and revival the dynamics of minority languages and the ecology of language It then offers a typological framework that draws and expands upon previous categorising efforts Finally the book presents four case studies that are both intrinsically interesting and more importantly provide specific illustrations of the generalities discussed earlier

Neoliberalism and Language Shift Ben Ó Ceallaigh, 2022-11-07 While economic forces are often cited as being a key cause of language loss there is very little research that explores this link in detail This work based on policy analysis and ethnographic data addresses this deficit It examines how neoliberalism the dominant economic orthodoxy of recent decades has impacted the vitality of Irish in the Republic of Ireland since 2008 Drawing on concepts well established in public policy studies but not prominent in the subfield of language policy the neoliberalisation of Irish language support measures is charted including the disproportionately severe budget cuts they received It is argued that neoliberalism's antipathy towards social planning and redistributive economic policies meant that supports for Irish were inevitably hit especially hard in an era of austerity Ethnographic data from Irish speaking communities reinforce this point and illustrate how macro level economic disruptions can affect language use at the micro level Labour market transformations emigration and the dismantling of community institutions are documented along with many related developments thereby highlighting an issue of relevance to communities around the world the fundamental tension between neoliberalism and language revitalisation efforts
