## Who Lives In Space:

**Land Use and Living Space** Robin H. Best, 2024-09-02 Few people have any coherent idea of whether the shifts taking place in land use structure are critically important for us all or whether they are largely immaterial This book originally published in 1981 by setting down a more quantified and carefully researched statement and appraisal of land use structure and change than had previously been attempted shows that much of the conventional wisdom about land use can be shown to be incorrect or very suspect Land use planning has often been built on the insecure foundation of myth rather than reality the author maintains Land Use and Living Space shows that much of the perceived land problem in Britain is not substantiated by evidence on the ground and concludes that there is no real problem at all This analysis was a welcome contribution to the debate during the 1970 and 80s about the true state of land use in Britain Europe and the USA

**The Life Space of the Urban Child** Gunter Mey, 2017-09-08 The heart of this book is the translation of The Life Space of the Urban Child written in 1935 by Martha and Hans Heinrich Muchow Life Space provides a fresh look at children as actors and how they absorb their city environments It uses an empirical base connected with theories about the worlds in which children live The first section provides historical background on Muchow's study and the author The second section presents the translation of the Life Space study as well as comments from an environmental psychologist's perspective The third section reviews the study's theoretical foundations including the concept of critical personalism the perspectives of phenomenology and the notion of Umwelt environment The last section addresses various lines of research developed from the Life Space study including Muchow's work in describing children in urban environments methodological approaches and the significance of space in social science and educational contexts The manner in which Martha Muchow conducted her studies is itself of note She obtained access to the children in their environments and combined observation with cartographies and essays produced by the children This approach was new at the time and continues to inspire researchers today This volume is the latest work in Transaction's History and Theory of Psychology series

**Life Space Management** P S Siwach, 2014-09-01 Life Space Management is a book that throws up a new concept of enhancing individual organisational effectiveness by managing the parameters of Life Space a word coined by Kurt Lewin Our entire effectiveness in life depends on how well we create space with others in the environment All of us intrinsically yet unknowingly practice the art of creating the right space whenever we interact with others Our entire relationship blooms and grows or diminishes based on the quantum of life space we create with them The author has researched on this new subject and put across his views to help the reader evolve and grow more effective in life
