Who Owns The Environment:

Who Owns the Environment? Peter J. Hill, Roger E. Meiners, 1998-08-20 The past several decades have witnessed a growing recognition that environmental concerns are essentially property rights issues. Despite agreement that an absence of well defined and consistently enforced property rights results in the exploitation of air, water and other natural resources, there is still widespread disagreement about many aspects of America's property rights paradigm. The prominent contributors to *Who Owns the Environment* explore numerous theoretical and empirical possibilities for remedying these problems. An important book for environmental economists and those interested in environmental policy. [Who Owns Outer](#)

[Space?](#) Michael Byers, Aaron Boley, 2023-04-13 From space debris to asteroid strikes to anti satellite weapons, humanity's rapid expansion into space raises major environmental safety and security challenges. In this book, Michael Byers and Aaron Boley, an international lawyer and an astrophysicist, identify and interrogate these challenges and propose actionable solutions. They explore essential questions: How do we ensure all of humanity benefits from the development of space and not just the world's richest people? Is it possible to avoid war in space? Byers and Boley explain the essential aspects of space science, international law and global governance in a fully transdisciplinary and highly accessible way. Addressing the latest and emerging developments in space, they equip readers with the knowledge and tools to engage in current and critically important legal, policy and scientific debates concerning the future development of space. This title is also available as Open Access on Cambridge Core. [OECD Environmental Performance Reviews: Norway 2011](#) OECD, 2011-05-19 This 2011 review of Norway's environmental conditions and policies evaluates progress in sustainable development, improving natural resource management, integrating environmental and economic policies, and strengthening international co-operation.

[Humour and Environmental Education](#) Constance Russell, Patrick Chandler, Justin Dillon, 2024-12-23 This book illustrates how humour can be a powerful tool for environmental education. Hailing from eight different countries, the authors' inquiries are grounded in a range of sites of learning and focus on different comedic forms, offering a variety of perspectives on the ways humour features or could feature in environmental education. The chapters adopt an array of methodological approaches and theoretical frames, drawing not only on environmental education research and humour studies but also scholarship in affect theory, anti-racist and Indigenous education, climate change communication, critical pedagogy, ecocriticism and language arts education, feminist theory, human-animal relations, media studies, new materialisms, philosophy, psychology, public pedagogy, science education and social movement studies. Many of the topics discussed in this volume necessitated multi- or interdisciplinary inquiries and pedagogies. Delving into humour led the authors to push beyond the boundaries of their own disciplines and for some to form creative collaborations that took them not only into new academic fields but also outside their professions to work with actors, cartoonists, comedians and game developers. This book was originally published as a special issue of *Environmental Education Research*. [ISO 14001 Environmental Certification](#)
