Carbon Footprint Framework:

Carbon Footprint Analysis Matthew John Franchetti, Defne Apul, 2012-06-18 The negative impacts of carbon emissions from human activities continue to dramatically reshape the environmental political and social landscape. These impacts coupled with cap and trade schemes iterate the importance and need to properly measure and reduce greenhouse gas emissions. *Carbon Footprint Analysis: Concepts, Methods, Implementation, and Case Studies* provides up-to-date technical information and practical guidance on measuring and reducing energy and GHG emissions. Presenting a comprehensive framework for carbon management, this book provides definitions, concepts, benefits, and background information regarding carbon footprint analyses. It discusses the GHG accounting methods, outlines the general systems framework for conducting an audit, and features four case studies in higher education, service, and manufacturing organizations. The book includes detailed discussions of the concepts and explains how the different concepts fit together. It supplies the necessary background as well as systematic tools and procedures for organizations to measure and reduce their carbon footprints and begin to adapt to a carbon-constrained world.

Life Cycle Assessment Aiduan Borrion, Mairi J Black, Onesmus Mwabonje, 2021-03-19 Life cycle assessment (LCA) is an established methodology used to quantify the environmental impacts of products, processes, and services. Circular economy (CE) thinking is a conceptual way of considering the impacts of consuming resources. By taking a closed-loop approach, CE provides a framework for influencing behaviours and practices to minimise this impact. Development of the circular economy is a crucial component in the progression towards future sustainability. This book provides a robust, systematic approach to the circular economy concept using the established methodology of LCA. Including chapters on circular economic thinking, the use of LCA as a metric, and linking LCA to the wider circular economy, this book utilises case studies to illustrate the approaches to LCA. With contributions from researchers worldwide, *Life Cycle Assessment* provides a practical, global guide for those who wish to use LCA as a research tool or to inform policy process and product improvement.

Handbook of Energy-Aware and Green Computing - Two Volume Set Ishfaq Ahmad, Sanjay Ranka, 2016-02-03 Implementing energy-efficient CPUs and peripherals, as well as reducing resource consumption, have become emerging trends in computing. As computers increase in speed and power, their energy issues become more and more prevalent. The need to develop and promote environmentally friendly computer technologies and systems has also come to the forefront.

Encyclopedia of Sustainable Technologies Martin Abraham, 2017-07-04 *Encyclopedia of Sustainable Technologies: Eight Volume Set* provides an authoritative assessment of the sustainable technologies that are currently available or in development. Sustainable technology includes the scientific understanding, development, and application of a wide range of technologies and processes and their environmental implications. Systems and lifecycle analyses of energy systems, environmental management, agriculture, manufacturing, and digital technologies provide a comprehensive method for understanding the full sustainability of processes. In addition, the development of clean processes through green chemistry

and engineering techniques are also described The book is the first multi volume reference work to employ both Life Cycle Analysis LCA and Triple Bottom Line TBL approaches to assessing the wide range of technologies available and their impact upon the world Both approaches are long established and widely recognized playing a key role in the organizing principles of this valuable work Provides readers with a one stop guide to the most current research in the field Presents a grounding of the fundamentals of the field of sustainable technologies Written by international leaders in the field offering comprehensive coverage of the field and a consistent high quality scientific standard Includes the Life Cycle Analysis and Triple Bottom Line approaches to help users understand and assess sustainable technologies

Assessment of Household Carbon Footprint Reduction Potentials, 2009 *Recent Advances in Industrial Production* Rajeev Agrawal, Jinesh Kumar Jain, Vinod Singh Yadav, Vijaya Kumar Manupati, Leonilde Varela, 2021-11-02 This book presents the select proceedings of the International Conference on Evolution in Manufacturing ICEM 2020 and examines a range of areas including evolution in manufacturing intelligent networks bio Inspired models and algorithms internet of things and cyber manufacturing This book intends to provide a contribution to the domain of collaborative and intelligent networks and systems to fill the gap in theories and practical applications through suitable methods and solutions applicable to a wide range of instances Various topics covered include broad range of research challenges in the fields of artificial intelligence and addressing current and future trends in industry 4 0 oriented scenario data analytics and big data operation and manufacturing management The book will be a valuable reference for beginners researchers and professionals interested in artificial intelligence in engineering and production management and allied fields

Clean and Renewable Energy Production Surajit Mondal, Adesh Kumar, Rupendra Kumar Pachauri, Amit Kumar Mondal, Vishal Kumar Singh, Amit Kumar Sharma, 2024-02-13 CLEAN and RENEWABLE ENERGY PRODUCTION According to the World Renewable Energy Council WREC by the year 2100 the world s population will increase to 12 billion and the worldwide energy demand will increase steeply to about five times the present scenario Researchers are striving to find alternative forms of energy and this quest is strongly forced by the increasing worry over climate change and planetary heating Among the diverse varieties of alternative energy sources biomass has the singular advantage of being carbon neutral The carbon that is discharged to the atmosphere during its exercise is read back during the utilization of biomass resources for energy output Currently biomass provides approximately 13% of the world s primary energy supply and more than 75% of global renewable energy Indeed it is estimated that bioenergy could contribute 25 33% of the global energy supply by 2050 Continued adoption of biomass will require efficient conversion rates and avoidance of competition with food and fibers This book focuses on the recent practices in clean energy and renewable energy The contributors highlight how newer technologies are reducing the dependency on non renewable resources benefiting the researchers who are working in the area of clean and renewable energy production This new volume will also benefit mechanical engineers electrical engineers and bioengineers as they will be updated with the recent work progressing

all over the globe It will benefit the professionals working in the renewable energy sector such as solar wind hydrothermal hydrogen and bioenergy including professors research scholars industry professionals and students working in this field

Modern Social Challenges Impacting Tourism: Ethics, Societal Disruption, and Intimacy Bayraktaroglu, Engin,Çıvık, Barış,2025-03-07 Modern social challenges shape the tourism industry highlighting the complex intersection of ethics societal disruption and intimacy in travel experiences As tourism grows it brings new ethical dilemmas such as the environmental impact of over tourism the exploitation of local communities and concerns over cultural appropriation At the same time rapid societal changes like economic conditions political instability or public health crises transform how people travel and interact with destinations The growing demand for personalized travel experience raises questions about privacy authenticity and connection Addressing these challenges through further research may provide sustainable practices ensure cultural sensitivity and address the well being of both travelers and host communities Modern Social Challenges Impacting Tourism Ethics Societal Disruption and Intimacy explores ethics moral issues social interactions and oppression within the tourism industry It examines how tourism affects local societies indigenous people women children and immigrants including the complex interactions and critical issues This book covers topics such as policymaking social media and tour guides and is a useful resource for business owners tourism professionals sociologists policymakers academicians and researchers

Carbon Footprint and the Industrial Life Cycle Roberto Álvarez Fernández,Sergio Zubelzu,Rodrigo Martínez,2017-05-28 This book analyzes the relationship between large scale industrial activity and the carbon footprint and provides a theoretical framework and tools to calculate the carbon footprint of industrial activities at every stage of their life cycles including urban planning master plans recycling activities project and building stages as well as managing and manufacturing Discussing the main preventative and corrective measures that can be utilized it includes case studies reports on technological developments and examples of successful policies to provide inspiration to readers This book collects the contributions of authors from four continents in order to analyze from as many as possible points of view and using many different approaches the problem of sustainability in today s globalized world Developing a Framework for a Toolkit for Carbon Footprint that Integrates Transit (CFIT) ,2010 The purpose of this research was to evaluate five transportation planning processes used in Florida to determine how greenhouse gas GHG emissions considerations can be incorporated into the processes These included the federal metropolitan planning organization long range transportation planning process MPO LRTP and transportation improvement programming TIP with application of federal Clean Air Act CAA air quality conformity analysis the National Environmental Policy Act NEPA environmental review process with application of CAA air quality conformity analysis the Florida local government comprehensive planning process and the Florida development of regional impact review process The research included a review of GHG emissions calculation tools and their applicability to each planning process The research also included four case studies from the states of New York California Washington and

Massachusetts featuring proposed transportation improvement projects and programming of varying scales and how GHG emissions were calculated and were figured into decision making The study also included the development of a scenario of a public bus transit improvement project that was used in calculating an estimate of generated GHG emissions The results of the study provided recommendations for the selection and use of GHG calculation tools as part of transportation planning processes discussed the limitations and uncertainties of the tools and provided recommendations for incorporating GHG emissions into planning processes Technical report documentation page *Impact of the Global Forest Industry on Atmospheric Greenhouse Gases* Reid Miner,2010 Data from some countries however suggest that sustainable forest management practices can be effective in keeping forest carbon stocks stable over time **Six Sigma for Sustainability** Tom McCarty,Michael Jordan,Daniel Probst,2011-07-27 PROVEN STRATEGIES FOR CREATING CORPORATE SUSTAINABILITY PROGRAMS Co written by Six Sigma Black Belts and LEED Accredited Professionals this pioneering guide reveals how to use the power of Six Sigma to develop and implement enterprise wide green initiatives Six Sigma Sustainability explains how typical Six Sigma DMAIC structures such as program governance project charters transfer functions measurement systems risk assessment and process design support environmentally sound business practices Real world examples demonstrate how specific problems in areas such as carbon emissions energy conservation materials recycling water use and finance can be solved using Six Sigma tools The detailed information in this practical resource helps you to deliver innovative programs that simultaneously reduce environmental impact and create business value COVERAGE INCLUDES Developing the business case for necessary investments in sustainability Sustainability leadership and the collaborative management model Applying the Six Sigma transfer function framework to identify critical drivers of success Sustainability measurement and reporting Designing a change management strategy and leveraging teams using the Six Sigma DMAIC framework Managing corporate real estate portfolios in compliance with green initiatives Case studies that show how to use Six Sigma methodologies to improve sustainability functions Design for Six Sigma using the House of Quality and other essential Six Sigma design tools Stakeholder management best practices for driving adoption of high quality solutions Green Supply Chain Management: Product Life Cycle Approach Hsiao-Fan Wang,Surendra M. preliminary assessment of parameter uncertainty associated with key model input data was also conducted To illustrate the policy relevance of this modeling framework a case study was conducted that analyzed the achievable carbon footprint reductions associated with the adoption of energy efficient household and supply chain technologies
