Principles of Green Design Nicole Elise Esposito,2013 A problem exists that many eco friendly products on the market today are not widely accepted by consumers Three pilot experiments were conducted to examine a few causes of poor eco friendly product acceptance The first two experiments involved the testing of alternative products to disposable plastic water bottles Two hypotheses were developed the attitude hypothesis and the user activity hypothesis The attitude hypothesis states that a person with a positive environmental attitude will lead to better eco friendly product recommendation and rating greater product uses and a greater chance of continued use The user activity hypothesis states that a product with difficult set up or cleaning will lead to a worse product recommendation and rating fewer product uses and a smaller chance of continued use Participants took home a product to test for one week and then returned to complete two surveys a demographics survey and a product evaluation survey These surveys measured variables such as environmental attitude product recommendation and rating

number of uses continued use and many others The results of the experiments show a relation between environmental attitude and the participants future usage with the eco friendly product In addition the data shows that difficulty of product set up and cleaning relate to the users opinion of the product Since this methodology of testing has not been documented before the lessons learned from these pilot experiments will help to develop a framework for product testing with human subjects The third pilot experiment tests the design method of defaults which may be a powerful tool when designing eco friendly products The theory behind the default option is that people typically choose the default setting on a product regardless if it is the best option This theory was tested with the use of automatic paper towel dispensers The lengths of the paper towels that the machines dispensed were changed periodically and the paper towel usage was measured The results from this experiment indicate that users obey the rule of defaults unless their needs are not being met at an extreme level The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969/1/148165> Advanced Design and Manufacture V Dai Zhong Su, Shi Fan Zhu, 2013-09-18 Volume is indexed by Thomson Reuters BCI WoS The book is a prestigious collection of refereed papers in advanced design manufacture and related subject areas The 161 papers are grouped as follows I Sustainable Development and Technologies II Product Industrial Design and Design Methodologies III Engineering Design IV Production Manufacture and Engineering Materials V CAD CAM CAE VI Gearing Mechanical Transmission and Mechanisms VII Machine Condition Monitoring VIII Finite Boundary Element Methods IX Optimisation Simulation and Computing Technologies X Manufacturing Informatics XI Robots and Control XII Engineering Management and Enterprise *The 3rd Africa International Conference on Clean Energy and Energy Storage (AICCEES)* Roland Uhunmwangho, Sunday Olayinka Oyedepo, Ogheneruona Endurance Diemuodeke, Fidelis Ibiang Abam, 2026-02-27 Selected peer reviewed full text papers from the 3rd Africa International Conference on Clean Energy and Energy Storage AICCEES 2025 Selected peer reviewed full text papers from the 3rd Africa International Conference on Clean Energy and Energy Storage AICCEES September 25 26 2025 Port Harcourt Nigeria **Policy Logical Frameworks for the Establishment of the Malawi Agriculture Policy Framework** Malawi, 2006 Achieving Sustainable Development in the Republic of Korea and Globally ,2007 **Applied Economic Issues in Malaysia** ,2006 **Proceedings of the ...
