Situating Globality:

Situating Globality Wim M. J. van Binsbergen, Rijk van Dijk, 2004 Situating Globality challenges the dominant view that globalization is a primary threat to African societies and economies It explores how these societies are appropriating elements of the emerging global culture arguing the significance of this appropriation in local struggles the expression of critical thinking ideologies and ritual styles of behaviour Combining an interest for micro level processes of situating the multifaceted process of globality with the exploration of reflexivity creativity and the production of knowledge Situating Globality straddles the divide between anthropological and philosophical representations of Africa in the new world order The first section examines philosophical issues relating to the production of knowledge in and about Africa from a globalizing perspective while the other sections include case studies showing how these processes are accommodated in everyday life

Agency and Changing World Views in Africa Dieter Neubert, Christine Scherer, 2014 Current debates on the transnational impact of world views interpretive frameworks often refer to the concepts of globalization or travelling models with an emphasis on domination or on a process of translation This volume highlights situations where different world views are confronted with each other within Africa and the question of how the actors mediate between the two The conceptual chapters foster a critical view on the normative implications of agency itself as well as how they reflect on the claim of interpretive hegemony of human rights concepts of law democracy or neoliberalism In addition the book examines the confrontation of world views in particular cases Essays examine distinct empirical grounds such as law e.g Islamic law children s rights law and development political ideology and analyze the role of transcendental powers Series Contributions to Research on Africa Beitrage zur Afrikaforschung Vol 40 Subject African Studies Politics Human Rights Law *Localising Salafism* Terje Østebø, 2011-09-30 With a particular focus on the role of situated actors this book sheds light on the emergence and expansion of Salafism in Bale Ethiopia from the late 1960s through the Marxist period 1974 1991 before discussing the rapid expansion and fragmentation of the movement in the 1990s until 2006 **International Media**

Studies Divya McMillin, 2009-02-04 International Media Studies is a bold introduction to the field that focuses on a de centering of media epistemology to represent a more thorough world view A comprehensive textbook exploring the current state of mediastudies as it is being practised across the world Takes discussions about media studies beyond other textbooks by situating the subject firmly in an international context appropriate to the globalized 21st century Surveys our reception of a wide variety of media content and formats including television magazines fiction newspapers and popular music Considers both theoretical and much needed ethnographic perspectives on media studies Showcases global and local media patterns in a variety of countries around the world including examples from Asia Africa and Latin America **Religion at Work in Globalised Traditions** Anders Kaliff, 2014-03-26 Why do traditions disappear How is the disappearance of tradition also a vehicle for social change and re inventions of practices and new traditions Using case studies from one Sukuma area along

the southern shores of Lake Victoria in Tanzania global processes of how religions work in practice are analysed by focusing on rainmaking witchcraft and Christianity Traditionally Sukuma society was culturally and cosmologically structured around the chief the ancestors and rainmaking Everything was dependent upon the rain Rainmaking as a ritual practice has disappeared and ancestral propitiations are declining while at the same time Christianity is spreading and witchcraft and witch killings are increasing Although Christianity as a religion may provide answers and hopes for life after death the religion provides few solutions in the here and now when it comes to poverty and suffering problems and challenges that have to be solved Witchcraft on the other hand does or is believed to do so and the increase in witchcraft is analysed in relation to the impacts of more than a century of globalisation from the missionaries and colonizers onwards With the declining ancestral tradition witchcraft and Christianity as religious practices supplement each other in the ways they are believed to work in providing answers solutions or divine interferences in different realms this world and the Otherworld Offering an approach going beyond structural functionalism on different premises the book s focus on religion at work will facilitate new understandings of how to study religion as it is perceived and believed in practice Paideuma Bd.52 / Jahrgang 2006 , Situating Globalization Cynthia Nelson,2000 The range of perspectives and original materials dealt with here highlights the renewed urgency of the struggle for cultural autonomy and voice within the context of globalization Each author explores how the various processes at both the local and global levels intersect to create new discourses and debates around the indigenization of knowledge If a new wind of cultural decolonization is blowing through the Arab Middle East and is having profound impact on the lives of men and women then we should expect a new scholarship to emerge in order to grasp it This book is a contribution in that direction A key dimension concerns the issue of borders and boundaries These are both real and imaginary i e symbolic and metaphoric hegemonic and counter hegemonic Among these borders are spatial ones that determine individuals and communities everyday location and place in the world these include boundaries of class gender territory and language Each of these separations in turn has embedded in it and rests on constructions of imaginary borders and boundaries The real and imaginary do not exist as two disparate entities but are inextricably linked to each other in a dialectical move that simultaneously enables and disables movement and action Current re visioning of globalization challenges past suppositions Globalization is a new form of an ongoing process that took inception during the heyday of colonialism It might serve as a descriptive term to articulate the current historical period but it remains theoretically problematic and imprecise Situating Globalization picks up on the problematics of power and its dispersal and concentration The bearers of these cultural flows seek legitimacy from their potential constituency by positing their language cultural and religious as local and therefore inherently in opposition to the hegemonic cultural knowledge that has seeped in from outside and led to disempowerment of local peoples and knowledges Bearers make no mention to this Islamist knowledge of the foreignness of this idiom to many within the societies in question Any attempt to contest their positioning and bearers of the
