Membrane Protein-Cytoskeleton Interactions, 1996-11-21 The plasma membrane acts as both a boundary and a site of exchange between the outside and the inside of a cell The cytoskeleton plays essential roles in delineating membrane protein distributions in defining structural and functional domains in the plasma membrane and in regulating membrane protein and ultimately cell function This volume reviews the regulation of membrane protein distribution organization and function at the plasma membrane by the cytoskeleton Discussions also include the roles of cytoskeleton in the structural and functional organization of membranes and membrane proteins with emphasis on key problems the current status of understanding experimental approaches and future directions

Human-Centred Software Engineering Regina Bernhaupt, Peter Forbrig, Jan Gulliksen, Marta Kristín Lárusdóttir, 2010-10-06 The conference series HCSE Human Centred Software Engineering was established four years ago in Salamanca HCSE 2010 is the third working conference of IFIP Working Group 13.2 Methodologies for User Centered Systems Design The goal of HCSE is to bring together researchers and practitioners interested in strengthening the scientific foundations of user interface design examining the relationship

between software engineering and human computer interaction and focusing on how to strengthen user centered design as an essential part of software engineering processes As a working conference substantial time was devoted to the open and lively discussion of papers The interest in the conference was positive in terms of submissions and participation We received 42 contributions that resulted in 10 long papers 5 short papers and 3 poster papers The selection was carried out carefully by the International Program Committee The result is a set of interesting and stimulating papers that address such important issues as contextual design user aware systems ubiquitous environments and usability evaluation The final program of the conference included a keynote by Liam Bannon with the title Approaches to Software Engineering A Human Centred Perspective This talk raised a lot of interesting questions for IFIP WG 13.2 and might have had some impact for participants to become a member of the working group We hope that participants considered HCSE 2010 as successful as its two predecessors in terms of interesting discussions and new ideas for scientific cooperation

Mathematical Methods for Hydrodynamic Limits Anna DeMasi, Errico Presutti, 1991 Entropy inequalities correlation functions couplings between stochastic processes are powerful techniques which have been extensively used to give a rigorous foundation to the theory of complex many component systems and to its many applications in a variety of fields as physics biology population dynamics economics The purpose of the book is to make these and other mathematical methods accessible to readers with a limited background in probability and physics by examining in detail a few models where the techniques emerge clearly while extra difficulties are kept to a minimum Lanford's method and its extension to the hierarchy of equations for the truncated correlation functions the v functions are presented and applied to prove the validity of macroscopic equations for stochastic particle systems which are perturbations of the independent and of the symmetric simple exclusion processes Entropy inequalities are discussed in the frame of the Guo-Papanicolaou-Varadhan technique and of the Kipnis-Olla-Varadhan super exponential estimates with reference to zero range models Discrete velocity Boltzmann equations reaction diffusion equations and non linear parabolic equations are considered as limits of particles models Phase separation phenomena are discussed in the context of Glauber-Kawasaki evolutions and

reaction diffusion equations Although the emphasis is on the mathematical aspects the physical motivations are explained through the analysis of the single models without attempting however to survey the entire subject of hydrodynamical limits
