Developments in Dynamic Soil-structure Interaction Polat Gllkan,Ray W. Clough,1993 For the last couple of decades it has been recognized that the foundation material on which a structure is constructed may interact dynamically with the structure during its response to dynamic excitation to the extent that the stresses and deflections in the system are modified from the values that would have been

developed if it had been on a rigid foundations This phenomenon is examined in detail in this book Effects of Soil Structure on Root Growth and Function Pedro Luiz de Freitas,1988 Seismic Evaluation and Retrofit of Concrete Buildings Craig D.
