**Syntactic Analysis and Description** David Lockwood,2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semantics Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time

**Standard Negation** Matti Miestamo,2008-08-22 This book is the first cross linguistic study of clausal negation based on an extensive and systematic language sample Methodological issues especially sampling are discussed at length Standard negation the basic structural means languages have for negating declarative verbal main clauses is typologized from a new perspective paying attention to structural differences between affirmatives and negatives In symmetric negation affirmative and negative structures show no differences except for the presence of the negative marker s whereas in asymmetric negation there are further structural differences i e asymmetries A distinction is made between constructional and paradigmatic asymmetry in the former the addition of the negative marker s is accompanied by further structural differences in comparison to the corresponding affirmative and in the latter the correspondences between the members of verbal etc paradigms used in affirmatives and negatives are not one to one Cross cutting the constructional paradigmatic distinction asymmetric negation can be further

divided into subtypes according to the nature of the asymmetry Standard negation structures found in the 297 sample languages are exemplified and discussed in detail The frequencies of the different types and some typological correlations are also examined Functional motivations are proposed for the structural types symmetric negatives are language internally analogous to the linguistic structure of the affirmative and asymmetric negatives are language externally analogous to different asymmetries between affirmation and negation on the functional level Relevant diachronic issues are also discussed The book is of interest to language typologists descriptive linguists and to all linguists interested in negation *Words on Cassette*, 2002 R R Bowker Publishing, 2002

**Europe and the Mediterranean as Linguistic Areas** Paolo Ramat, Elisa Roma, 2007-07-13 This volume is a collection of 12 papers which originated from a research project on Europe and the Mediterranean from a linguistic point of view history and prospects The papers deal with specific morphosyntactic aspects of language structure and evolution The comparative perspective is adopted both from a synchronic typological and a diachronic historical angle focusing in particular on possible contact phenomena Therefore methodological key words of this book are areal typology and linguistic area The issues addressed cover such diverse aspects of language structure and change as verb morphology relative clause formation Noun Phrase determination demonstrative systems possessive markers in Noun Phrases conjunctive disjunctive and adversative constructions non canonical object marking impersonal constructions reduplication and early translations of the Gospels These topics are discussed particularly in relation to Romance Germanic Celtic and Semitic languages both modern and ancient This book will interest researchers in typological historical functional and general linguistics
