## Teachers Professional Lives:

**Professional Knowledge, Professional Lives** Goodson, Ivor, 2003-09-01 Ivor Goodson gives an examination of the state of professional knowledge in teaching and teacher education It argues that a more active notion of teachers professional knowledge can and should be explored and consolidated by work which focuses on the teacher's life and work using more reflective modes

*"Endemic Uncertainties"* Harris Sockel, 2012 Explores the effects that principles of certainty have on teachers professional lives and their attitudes toward their work

**The New Lives of Teachers** Christopher Day, Qing Gu, 2010-06-10 The New Lives of Teachers examines the varied often demanding commitments on teachers lives today as they attempt to pursue careers in primary and secondary education Building upon Huberman's classic study it probes not only teachers everyday lives but also the ways in which they negotiate the pitfalls of professional development and the different life and work scenarios that challenge their sense of identity well being and effectiveness The authors provide a new evidence based framework to investigate and understand teachers lives Using a range of contemporary examples of teaching they demonstrate that it is the relative success with which teachers manage various personal work and external policy challenges that is a key factor in the satisfaction commitment well being and effectiveness of teachers in different contexts and at different times in their work and lives The positive and negative influences upon career and professional development and the influences of school leadership culture colleagues and conditions are also shown to be profound and relate directly to teacher retention and the work life balance agenda The implications of these insights for teaching quality and teacher retention are discussed This book will be of special interest to teachers teachers associations policy makers school leaders and teacher educators and should also be of interest to students on postgraduate courses

**The Role of Unions in Teachers' Professional Lives** Nina Bascia, 1992

*Handbook of Teacher Education* Tony Townsend, Richard Bates, 2006-08-09 This book has its origins in conversations that started when the International Council on Education for Teaching ICET and the Australian Teacher Education Association ATEA jointly agreed to co sponsor a World Assembly of Teacher Educators in Melbourne in July 2003 hosted by Monash University The editors of this book were not only intimately involved in the management of the conference but had also been key figures in the Associations involved Tony Townsend had been secretary and on the national board of the South Pacific Association for Teacher Education SPATE which later became ATEA and had previously managed a SPATE

conference in Frankston Australia in the 1980s He is currently the President of ICET and now works at Florida Atlantic University Richard Bates has been a long time board member of ATEA and is currently President of that organization He is also a Board member of ICET The International Council on Education for Teaching ICET was founded in 1953 for the purpose of emphasizing international cooperation in educational development in order to improve the quality of teacher education as well as to expand global educational opportunities for people in teacher education Since that time ICET has developed into an international association of practitioners of teacher education policy and decision makers in education government and business dedicated to global development through education ICET is a Non Governmental Organization NGO and participates in NGO meetings and other UNESCO sponsored conferences around the world *Christianity, Education, and Modern Society* William Jaynes, Enedina Martinez, 2007-10-01 The issues that these authors address in this book are some of the most salient in American society It is imperative that Americans today address these issues and establish an appropriate world view There is little question that how people resolve these issues will have a long lasting impact on the future of civilization

**Unions in Teachers' Professional Lives** Nina Bascia, 1994-01-01 Partnership and Change Leslie Nai-Kwai Lo, Allan Walker, 2004 There has been a dearth of books covering themes and issues related to university school partnerships and school development from an international perspective particularly providing examples on university school partnerships in the Asia Pacific region The book is broadly divided into two parts Part One focuses on university school partnership while Part Two highlights changes in school development The nature of different partnerships as well as the experiences of and research on school development in connection with individual strategies and organizational strategies are described The contributors are all renowned scholars school reformers and experienced practitioners from the United States Norway Sweden the United Kingdom Australia and Hong Kong Together they provide an international perspective on the issues related to school partnerships and development Professionalism and Teacher Education Amanda Gutierrez, Jillian Fox, Colette Alexander, 2019-05-15 This book explores how educators are proactively working to reclaim teacher professionalism by engaging in exemplary practice and promoting quality education for all It examines voices in contemporary Australian teacher education and how professionalism can contribute to achieving the multiplicity of purposes in education The work of contemporary teachers and teacher educators and perceptions about this work have changed significantly In recent times governments have identified key issues linked to the quality of teachers as presented in multiple inquiries creating shifts in public policy and increasing regulation Educators must work towards improving public and policy maker perceptions of teaching as a profession Teacher educators make an important contribution in engaging in ongoing scholarship and debate that examine research and practice and speak back to managerial discourses on professionalism It is through this work that educators shape and re shape understanding of what it means to be a professional **A Companion to Research in Teacher Education** Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art

Companion assembles and assesses the extant research available on teacher education and provides clear guidelines on future directions. It addresses an important need in a collection that will be of value for teachers, teacher educators, policymakers and politicians. There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge. Many of the changes to teacher education are contentious and yet are occurring in rapid succession. These policies and movements have important consequences for education, teacher quality and the future of the teaching profession. At the same time the policies and initiatives that support these changes seem to be based more on ideology, business interests and tradition than on research and empirical findings. The nature, quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among governments, think tanks, world policy agencies, education researchers and teacher organisations.

Narrative Pedagogy Ivor Goodson, Scherto Gill, 2011. It is widely recognised that we are living through an age of the narrative. Many of the constituent disciplines in the social sciences resonate with this trend by using life history and narrative approaches and methods. As we move on from the modernist period which prioritised objectivity into the postmodern regard for subjectivity, this resort to narrative is likely to become more apparent and explicit in academic as well as social and commercial discourse. One aspect of this narrative form which is commonly overlooked is that of the pedagogic encounter. This is the phenomenon which is addressed by all narrative and biographical research. Fundamentally reflecting and examining the narrative of our lives in the process of learning, this book provides a series of studies and guidelines for what we have termed narrative pedagogy. It presents a resource for an exploration of those narrative processes that can lead to meaningful change and development for individuals and groups within a learning environment and in life learning. This focus on life history allows us to identify and support routes to learning within the narrative landscape of learners and through these pedagogic encounters.

**Teachers' Professional Lives in a DEIS Band 1 School** Eoin O'Mahony, 2017 *Education for Environmental Sustainability* Elizabeth Rushton, 2025-09-18. Drawing extensively on contemporary research and empirical evidence including that from the UK, Australia, Brazil and Europe, this book sets out the key ideas, concepts and approaches for education for environmental sustainability in the context of teacher education.

**Career Teachers** Joan Louise Hochschild, 1987 Quality of Professional Life for Teachers Jeffrey J. Thomas, 2011. This study examined the quality of professional life at a Title I school that has achieved the Arizona Department of Education's highest accountability rating of Excelling for eight consecutive years. By examining the factors that influence the school environment including teachers' attitudes and the connections within the teacher community at this school, a description emerged of the factors that influenced the quality of professional lives of teachers. This descriptive study sought to describe: What is the quality of professional life for teachers at a Title I elementary school with a history of high levels of student achievement? The research

was conducted at Seneca Elementary school a pseudonym in the Seneca School District a pseudonym By examining the quality of professional life for teachers in a highly ranked Title I school a better understanding of the quality of professional life may lead to recommendations for other schools with high levels of poverty on how to support teachers who work in high poverty schools Within a theoretical framework of motivation hygiene theory and socio cultural theory the study identified principal leadership as a primary supporting factor of quality of professional life The study also identified lack of input and lack of teacher control over curriculum and instruction as barriers to quality of professional life Teachers described principal leadership environment social factors and teacher identity as contributors to enhancing the quality of professional life Trust and focus emerged as additional factors that improved the workplace for teachers *Professional Lives in Context* Rosebud Elijah, 1996
