## **The Diffusion Of Classical Art:**

The Diffusion of Classical Art in Antiquity John Boardman, 2023-10-17 From one of the world's leading authorities on ancient Greek art a groundbreaking account of how Greek images were understood and used by other ancient peoples from Britain to China In this book acclaimed archaeologist and art historian John Boardman explores Greek art as a foreign art transmitted to the non-Greeks of antiquity peoples who weren't necessarily able to judge the meaning of Greek art and who may have regarded the Greeks themselves with great hostility Boardman examines how and why the arts of the classical world traveled and to what effect from Britain to China from roughly the eighth century BCE to the early centuries CE In some places such as Italy Greek images were overwhelmingly successful In Egypt the Celtic world the eastern steppes and other regions with strong local traditions they were never effectively assimilated And in cultures where there was a subtler blend of influences notably in the Buddhist east classical images served as a catalyst to the generation of new styles Along the way Boardman demonstrates that looking at Greek art from the outside provides a wealth of new insights into Greek art itself and he raises important questions about how images in general are copied and reinterpreted

**The Oxford History of Western Art** Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross-media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the redefinition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged

sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

*Regional Schools in Hellenistic Sculpture* Olga Palagia, 2017-02-28 Essays describing recent research and new discoveries of Hellenistic sculpture based on papers presented at an international conference at the American School of Classical Studies at Athens in 1996

*The Oxford History of Classical Art* John Boardman, 2001 The art and architecture of Greece and Rome lie at the heart of the classical tradition of the western world and their legacy is so familiar as to have become commonplace The legacy may appear simple but the development of classical art in antiquity was complex and remarkably swift It ran from near abstraction in eighth century BC Greece through years of observation and learning from the arts of the non Greek world to the east and in Egypt to the brilliance of the classical revolution of the fifth century which revealed attitudes and styles undreamt of by other cultures After Alexander the Great this became the art of an empire readily learned by Rome and further developed according to the Romans special character and needs until it provided the idiom for the imaging of Christianity In this book the story of this pageant of the arts over some 1500 years is told by five leading scholars Their aim has been to demonstrate how the arts served very different societies and patrons tyrannies democracies empires the roles and objectives of the artists the way in which the classical style was disseminated far beyond the borders of the Greek and Roman world but especially the splendour and quality of the arts themselves And their method is to engage the interest of the reader by a rich succession of illustrations on to which the narrative is woven
