The intent of this book is to supply members of this discomfited and threatened group here provisionally defined as the American Majority with a systematic diagnosis of the diseases and debilities that have laid them low and some suggestions for their recovery So many liberals having become minority racists and so many conservatives having become rootless cranks so much religion having become social science and so much social science having become intellectual sleight of hand the thoughtful Majority member has nowhere to turn but to himself This however may be his salvation In isolation the critical faculty cuts deeper Only now is it possible to understand the tragic and humiliating fate of the American Majority because only now are a few Majority minds deepened by decades of solitary contemplation and sharpened by the grim chronicle of events finally tuning to the emergency wavelength of collective survival No one who reads this all encompassing study of the American predicament will ever again view his country and himself in the same light The author brilliantly recounts the tragedy of a great people the Americans of European descent who founded and built The United States and whose decline is the chief cause of America s decline Although replete with cogent criticism of the people and events which have brought America low the book ends on a positive optimistic note which envisions a resurgent American Majority liberating its institutions from the control of intolerant intellectuals innately programmed to destroy what they could never create The Dispossessed Majority Wilmot Robertson,1972

personality trait measurement was one of the most influential psychologists in the twentieth century the author of fifty six books more than five hundred journal articles and book chapters and some thirty standardized instruments for assessing personality and intelligence in a professional career that spanned almost seventy years In August 1997 the American Psychological Association announced that Cattell had been selected the recipient of the American Psychological Foundation Gold Medal Award for Life Achievement in Psychological Science Then only two days before the scheduled ceremony the APF abruptly postponed the presentation of the award due to concerns involving Cattell s views on racial segregation and eugenics In addition to his mainstream research Cattell had also authored a series of publications that posited evolutionary progress as the ultimate goal of human existence and argued that scientifically measurable criteria should be used to distinguish successful from failing racial groups so that the latter might be gradually phased out by non violent methods such as regulation of birth control Derived from science Cattell s evolutionary philosophy was intended to be the basis of a full blown religion Although the earliest of these works had been published in the 1930s near the end of an era in which eugenically based policies for human improvement were much more acceptable Cattell promoted similar ideas well into the 1980s and 90s The Cattell Controversy describes Cattell s socio religious beliefs in detail and analyzes their relationship to

his scientific contributions William H Tucker discusses the controversy that arose within the field in response to the award's postponement after which Cattell withdrew his name from consideration for the award but insisted that his position had been distorted by taking statements out of context Reflecting on these events Tucker concludes with a discussion of the complex question of whether and how a scientist's ideological views should ever be a relevant factor in determining the value of his or her contributions to the field
